- **SHADE TREES** •
- **FRUIT TREES** •

To Our Friends:

The Champion Nurseries were founded 59 years ago by Hartwell J. Champion, and since his death in 1921, has been managed and operated by his son, Arthur N. Champion.

The nursery was started on a little farm containing twenty-four acres, about half of which was devoted to the growing of nursery stock, consisting of small fruit plants, peach and other fruit trees; a few years later hardy shrubs, shade trees and ornamentals were added.

Although the growth of the business has not been rapid it has been constant, due in no small degree to the founder's integrity, which was beyond reproach.

Since the founder's death, the business has been carried on by the younger generation who have adhered so closely to the founder's policies and business principles that the business has slowly grown to such an extent that it requires 350 acres of land to supply the trade at the present time.

We wish to express our appreciation at this time to our many friends and customers for their splendid cooperation in helping to build up this business to a point where it is a real service to the nursery-buying public.

It has always been our policy to welcome our friends and customers to inspect our nursery and packing houses and are always glad to show them our stock whether interested in purchasing or not. We therefore extend to you a cordial invitation to visit us.

MASSACHUSETTS TRUENESS-TO-NAME INSPECTION SERVICE

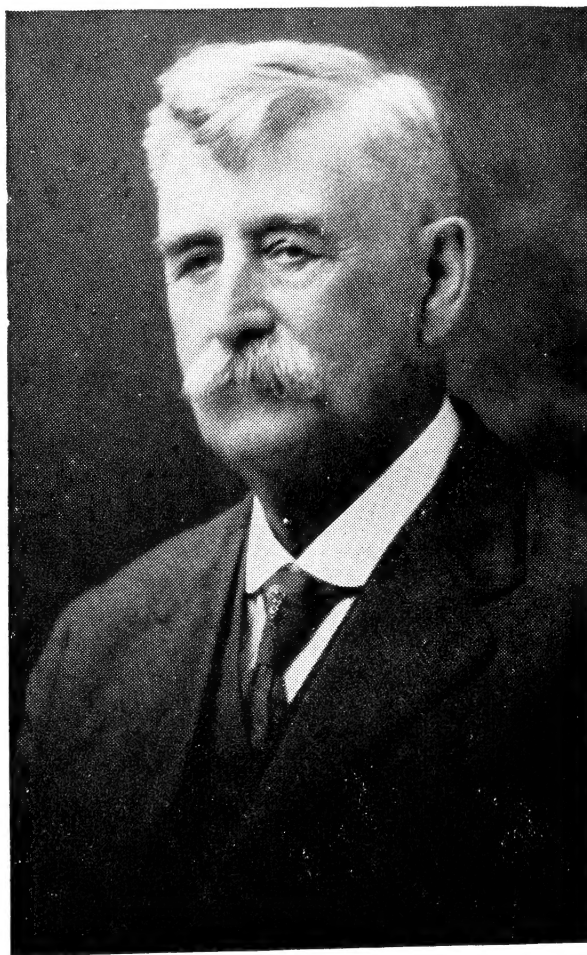

The Massachusetts Fruit Growers' Association

Statement of Inspection for Trueness-to-Name

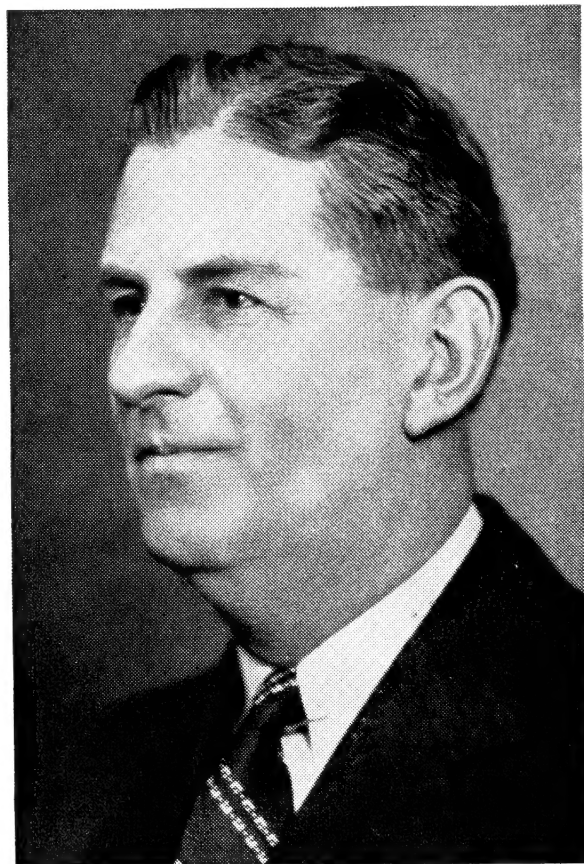

Amherst, Mass., August 4, 1949

All of the apple, pear, 2 yr. plum, and sweet cherry varieties propagated and now growing in the Champion Nurseries, Perry, Ohio, have been examined by the Massachusetts Trueness-to-Name Inspection Service. To the best of our knowledge, these trees are true to name as they now stand in the nursery row.

SATISFACTION GUARANTEED

We guarantee the delivery to YOU, our CUSTOMER, of all the nursery stock in first class condition. If for any reason at all, the shipment does not arrive in first class condition, notify us at once and we will make prompt satisfactory adjustment.

We guarantee to deliver to you healthy, vigorous stock, free from disease which if properly handled and planted will grow. However, if, due to unfavorable weather, such as drought, excessive rainfall, or other conditions over which we have no control, they fail to grow, we will replace at half price. You must notify us of the failure to grow not later than **JULY 10th** following the season in which they were purchased.

For your assurance of buying trees which are true to name we ask you to read the statement of inspection which appears on this page.

PLANTING A FRUIT GARDEN

This year we were able to secure a quantity of this small booklet which we are offering while they last to our customers. It contains planning, trimming, feeding, thinning, spraying and after care for the successful growing of fruit trees and berry plants. The man that wants to grow his own fruit should not be without this booklet. Please mail 25c to cover the cost of handling and mailing and we will send it to you promptly.

Climbing Roses

\$1.19 each; 10 for \$9.98

Except Where Noted

ALBERTINE. Peach-pink, with a tint of salmon. A large flower usually on single stems, finely formed like the Hybrid Tea and Hot-House Rose. Blooms in June.

CL. AMERICAN BEAUTY. Large, sweet-scented, deep rose-pink. You can cut quantities of the long-stemmed, fully double blooms without spoiling the outdoor display.

CLIMBING TALISMAN. Strong, vigorous plant, well covered with the same beautiful, fragrant flowers of the bush type.

DR. VAN FLEET. Flesh-pink. Very vigorous, with large, double, fragrant flowers. Blooms early and for a long time.

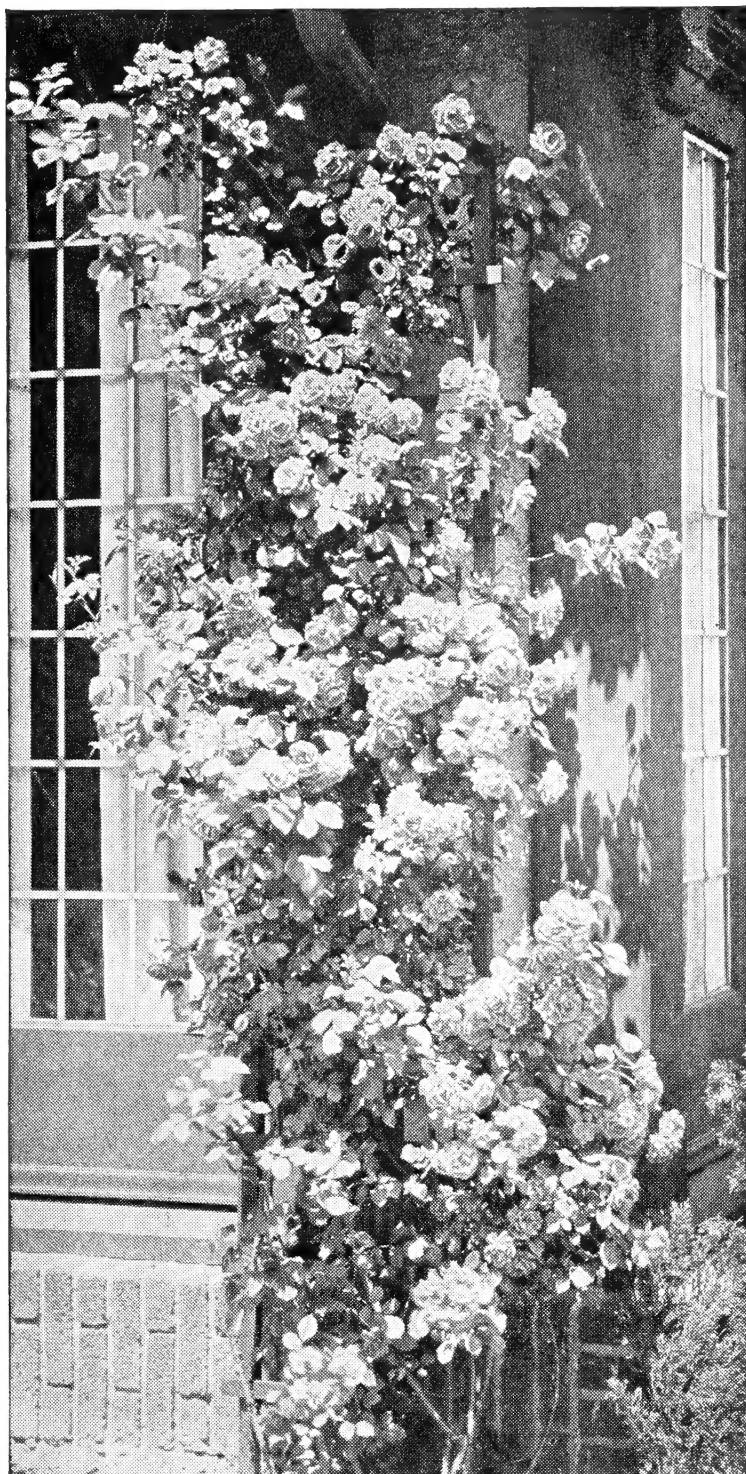

JACOTTE. A lovely yellow, noted also for hardiness and vigorous, healthy growth. Shapely buds and large, firm-textured blooms of buff-yellow flushed apricot.

MAD. GREGORE STAECHLIN. Spanish beauty. Early. Long-pointed buds open to perfumed, urn-shaped, pearl-pink blooms, the outside of the petals deeper pink.

MARY WALLACE. Mid-season. Vigorous plants are covered with large, cup-shaped flowers of glowing rose-pink. Very hardy.

NEW DAWN. Everblooming Dr. Van Fleet. A lovely soft pink. Blooms throughout the summer and fall. **\$1.50 each; 3 for \$3.75.**

PAUL'S SCARLET CLIMBER. Most famous, and beautiful of the June red climbers. Large, semi-double flowers on long stems in bold clusters, hold their vivid scarlet until the last petals fall.

PAUL'S SCARLET CLIMBER

Floribunda and Polyantha Roses

\$1.19 each; 10 for \$9.98

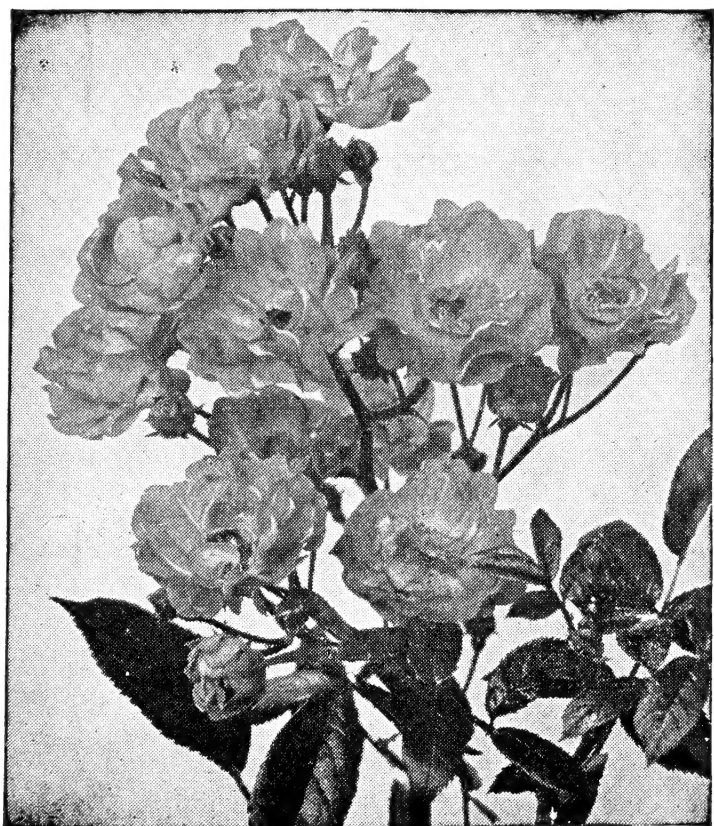

ELSIE POULSEN. A truly delightful Floribunda Rose which grows readily and blooms heavily, practically the entire summer. Color is a light silvery pink. Upright growth. Ideal for bedding along driveways, around bird baths, etc.

GLORIA MUNDI. Flaming beauty, with large double flowers of blazing orange-scarlet the season through.

PINK LAFAYETTE. Vivid pink. Each flower 3 inches in diameter, forming a complete blanket over the plant.

RED LAFAYETTE. Improved. Cherry-red. Makes a grand border rose, lavishly covered with brilliant blooms all season.

← Gloria Mundi Polyantha Rose

Golden Sastago

Hybrid Tea Roses

Blue Ribbon
ea. \$1.19; 6, \$6.49; 12, \$11.98

Red Ribbon
ea. 98c; 6, \$5.49; 12, \$9.98

These are the famous Hybrid Teas, with their matchless blooms of grand form, exquisitely colored, so rich in fragrance. Blooms from June until killing frost. Become a leader in your neighborhood by planting Champion's Roses, grown exclusively in our Nursery at Perry, Ohio; on the southern shores of Lake Erie.

AMI QUINARD. Best dark maroon rose, nearly black, with a rich velvety sheen. Very fragrant.

BETTY UPRICHARD. Its spicy blooms are distinctly bicolored, the outside of the petals deep carmine, inside silvery salmon.

C. K. DOUGLAS. One of our best sellers. Brilliant crimson with scarlet undertone. Every rose garden should have at least one of these.

CONDESSA DE SASTAGO. A new rose sensation, bearing large flowers of rich copper-red inside, outside a golden yellow.

EDITH KRAUSE. One of the loveliest of the pure white roses. No garden is complete without this outstanding rose.

ETOILE DE HOLLAND. Of delightful crimson color. Produces fine long cutting stems, a free bloomer with intense true rose perfume.

GENERAL MacARTHUR. A great new rose worthy of our great Commander's name. Long buds open slowly into magnificent flowers of rose, gold and salmon in a breath taking blend.

GOLDEN SASTAGO. Buttercup yellow. This gleaming yellow fragrant flower is a continuous joy to any gardener.

GRENOBLE. Great high-centered flowers of fiery scarlet-crimson, spicily fragrant, produced on long stems, wonderful for cutting.

JOANNA HILL. Yellow. Another variety popular for cut flowers. Beautifully formed buds of apricot opening to large full flowers, center orange, paling to cream at edges.

JOS. PERAUD. The long pointed, opening buds have delightful glowing yellow sunset shades that change to nasturtium, buff as the fragrant flowers slowly unfold.

K. A. VICTORIA. Superb ivory-white flowers of perfect form and sweetest fragrance. Very double flowers on plants of medium height.

MAD. JULES BOUCHE. The large buds of creamy white open with a dainty flush of pink in the center, changing to all white. Sweet scented.

MARGARET McGREDY. Large, full flowers of brilliant orange-scarlet blending to luminous carmine-rose. Vigorous plants give a constant production of blooms from June until hard frost.

McGREDY'S SCARLET. Large, perfect shaped flowers of scarlet beauty. A very popular highly rated rose; and very nice for cutflowers.

MISS ROWENA THOM. Rose-pink, healthy, vigorous, free blooming like its parent, Radiance. Long pointed buds.

MRS. E. P. THOM. The buds are long pointed and open to well formed blooms of clear yellow without any carmine markings. Very nice for bedding and for cut-flowers.

HYBRID TEA ROSES (Continued)

MRS. HENRY BOWLES. A very lovely, lasting rose. Pink shaded salmon. Very fragrant and beautiful long pointed buds.

PINK RADIANCE. No other rose has reached it in popularity. Superb large flowers of silvery pink are borne in great abundance on tall strong stems.

POINSETTIA. Well formed, lovely long buds and richly colored flowers of poinsettia-scarlet.

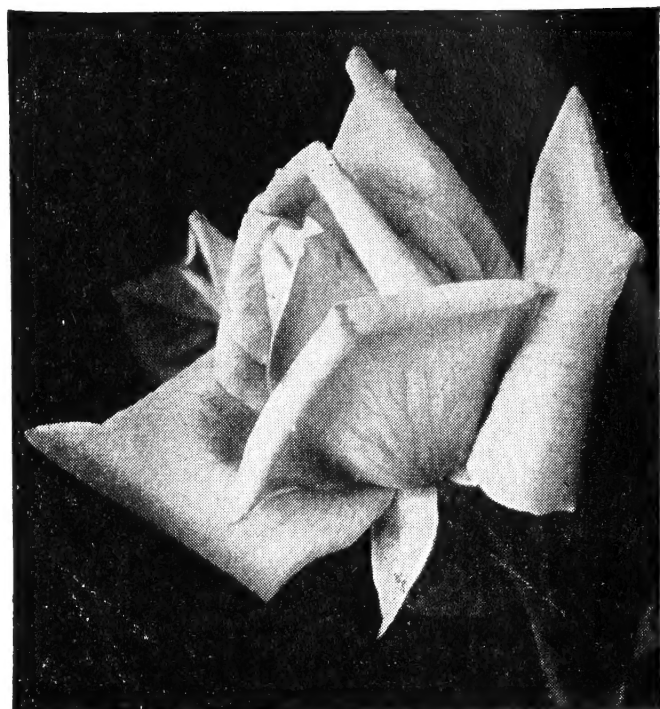

PRES. HOOVER. Multicolored. The large, well modeled, fragrant blooms of scarlet, yellow, cerise, and flame colors come singly on erect firm stems. Tall, vigorous plant.

PRES. PLUMECOCO. Coppery yellow and apricot. This super-fine rose should be in every garden.

RED RADIANCE. Cerise-red. One of the greatest of all red roses and does well under a wide variety of growing conditions.

SOEUR THERESE. Buttercup-yellow. This is the most astonishing variety in the yellow class for it blooms in candelabras (not clusters) of from 5 to 15 flowers, forming on top of sturdy canes that hold the blooms erect.

TALISMAN. Great favorite and a great beauty. At its gayest it is a glorious combination of orange, yellow, and rose-red. One of the finest of all garden roses for cutting, with its choice, distinctive form.

Willowmere

WILLOWMERE. The flowers are brilliant pink suffused with a rich golden light. A rose that will be a standout in any garden.

HYBRID PERPETUAL ROSE

F. K. DRUSCHKI. Repeats its blooms throughout the season. Best known of all pure white roses. Persistent bloomer. Strong, vigorous grower.

Peonies

Divisions (3-5 eyes)

\$1.19 each

Clumps (whole plants)

\$2.49 each

BARONESS SCHROEDER. White with shading of flesh-pink.

COURRONNE D'OR. Immense white blossoms with crimson blotches. Late.

EDULIS SUPERBA. Very early, crown type, old-rose pink.

FELIX CROUSE. Medium sized very brilliant red flower, dark green foliage.

FESTIVA MAXIMA. Pure white with crimson splashes in center.

FRAGRANCE. Very outstanding, being an off shade of red.

LOUISE BRAND. One of our nicest, of the rose-pink variety.

MAD. J. DESSERT. Medium-Late. Light opalescent pink.

MARCHIONESS OF LANSDOWNE. Large white flowers shaded with pink.

MONS JULES ELIE. Glossy lilac pink shading a deeper pink at the base, the entire flower over-laid with a silver cast.

Festiva Maxima

President Taft. Delicate hydrangea pink, completely enveloped in a halo of white, profuse bloomer.

Sarah Bernhardt. A late bloomer; flat, compact, rose type, rose pink with silver tip. A bright, apple-blossom pink, very free flowering of perfectly formed blooms.

Hardy Shrubs

FLOWERING ALMOND

ALMOND. A very charming, attractive shrub in early spring, being in full bloom before its leaves appear. The flowers are small double and light pink and a mass of these in the right spot certainly will draw many well deserved compliments.

18-24 in. .98 each; 3 for 2.79
2-3 ft. \$1.19 each; 3 for \$3.49

ROSE OF SHARON

ALTHEA. Blooms late in August and September, with a profusion of large and brightly colored flowers, much like the tender hibiscus in form. Double rose, double white, double purple, double red, single red and single white.

2-3 ft. \$.98 each; 3 for \$2.49
3-4 ft. 1.19 each; 3 for 3.49

SHADBLOW

AMELANCHIER CANADENSIS. Covered with beautiful white flowers in early spring followed by large quantities of purple-black berries. A beautiful specimen and its early flowering habit makes it stand out as the blooming period is entirely separate from most other shrubs.

18-24 in. \$.98 each; 3 for \$2.79
2-3 ft. 1.19 each; 3 for 3.49

ARALIA

PENTAPHYLLA. (Five-leafed Aralia). Long, slender, gracefully drooping branches a rich shiny green. Unique among shrubs in that it does not change color.

2-3 ft. \$.89 each; 3 for \$2.49
3-4 ft. 1.19 each; 3 for 3.49
4-5 ft. 1.49 each; 3 for 4.29

BEAUTYBERRY

CALLICARPA PURPUREA. Gracefully curving branches, covered in August with thousands of closely set small pink tinted flowers. These are followed in late September by masses of violet-purple berries which last until mid-winter.

18-24 in. \$1.19 each; 3 for \$3.19

BUTTERFLY BUSH

BUDDLEIA. A sensational group of late summer bloomers, long spike flowers which give a gorgeous show. They may be purchased in White, Purple, Pink, and Red.

Heavy 2 yr. plants — 98c each; 3 for \$2.79

BLUE MIST

CARYOPTERIS. This low growing plant is one of the best of the border plants. It is covered from August till frost with clusters of powdery blue fringed flowers. It attains a height of from 18-24 inches and remains perfectly rounded, making a small mound about two feet in diameter. The foliage is toothed and silvery green in color. It is a gorgeous asset to the flower border or in front of the shrub border.

15-18 in. \$1.19 each; 3 for \$3.19

BEAUTYBUSH

KOLKWITZIA AMABILIS. (Beauty Bush). A charming shrub with attractive leaves and gracefully arching branches. The beautiful flowers appear in great profusion in June, in pairs which cluster closely in cymes of about twenty-five; bell shaped and somewhat lipped, pale pink with orange veins in the throat.

2-3 ft. \$1.19 each; 3 for \$3.49

SIBERIAN PEA SHRUB

CARAGANA ABORESCENS. A strong vigorous grower which makes a fine showing with its bright green leaves and many clusters of bright yellow flowers. Very hardy and may be used often with good results.

18-24 in. \$.98 each; 3 for \$2.79
2-3 ft. 1.19 each; 3 for 3.49

SWEET PEPPER BUSH

CLETHRA ALNIFOLIA. A small shrub very fragrant in August and September, when covered with long snowy wands of creamy white flowers. It is used well in a border close to a house where the fragrance may drift in through the window.

18-24 in. \$.98 each; 3 for \$2.79
2-3 ft. 1.19 each; 3 for 3.49

GARLAND FLOWER

DAPHNE CNEORUM. A hardy dwarf shrub with spreading branches seldom growing taller than 10 to 12 inches. The masses of bright pink fragrant flowers appear in May and again at intervals during the Summer and Fall.

8-10 in. B&B \$1.69 — 10-12 in. B&B \$1.98
12-15 in. B&B \$2.79

RED CHOKEBERRY

ARONIA ARBUTIFOLIA. It bears an abundance of white flowers in May and its amazing red berries and foliage in the fall greatly increase its value, carrying well into the winter. Does well in damp locations.

18-24 in. \$.98 each; 3 for \$2.79
2-3 ft. 1.19 each; 3 for 3.49

Assorted Altheas (Rose of Sharon)

CUT LEAF ELDER

SAMBUCUS CANADENSIS ACUTILOBA. Beautiful dark green fern-like leaves finely cut. It has a profusion of white flowers from May to June.
3-4 ft. \$1.98 each; 3 for \$4.98

CUT LEAF SUMAC

RHUS TYPHINA LACINATA. Very attractive with its long, feathery leaves which are finely cut. A rapid grower and very hardy.
2-3 ft. \$1.19 each; 3 for \$3.19
3-4 ft. 1.98 each; 3 for 4.98

CALYCANTHUS

FLORIDUS. (Carolina Allspice). The strong reddish brown shoots are covered with large glossy leaves from the axils of which spring odd double spicy flowers of chocolate red which are quite fragrant.
18-24 in., 98c each; 3 for \$2.79
2-3 ft. \$1.19 each; 3 for \$3.49

DEUTZIA LEMOINE

DEUTZIA

GRACILIS. (Slender Deutzia). An excellent shrub for border planting and very attractive when covered with its many bead-like buds which open into pure white flowers in June. Two feet.
12-15 in. 79c each; 3 for \$2.19

LEMOINEI. (Lemoine's Deutzia). Medium large flowers of pure white borne in cone shaped heads, attains a height of four feet.
18-24 in. 89c each; 3 for \$2.49

SCABRA. (Pride of Rochester). Grows more bushily and blooms in May before the others. The flowers are large, free and double white.
2-3 ft. \$.98 each; 3 for \$2.79
3-4 ft. 1.19 each; 3 for 3.49

FORSYTHIAS SPECTABILIS FORSYTHIAS

Golden Bells

SPECTABILIS. A type very similar to Intermedia, in growth and habit, but having a much larger flower and many more blooms on each plant.
2-3 ft. \$.98 each; 3 for \$2.79
3-4 ft. \$1.19 each; 3 for \$3.49

SUSPENS. This is the only weeping form of the golden bells. Slender drooping branches strung with yellow flowers and followed by many shiny dark green leaves. May be used to good advantage on trellis and along the top of rock walls. Can be planted on banks, where it is difficult for other plants to grow.
2-3 ft. \$.98 each; 3 for \$2.79
3-4 ft. \$1.19 each; 3 for \$3.49

DOGWOOD

CORNUS ELEGANTISSIMA. (Silver Leaf Variegated Dogwood). Purplish red branches with beautiful silver variegated foliage. A beautiful plant in both summer and winter.
2-3 ft. \$1.19 each; 3 for \$3.19

CORNUS LUTEA. (Yellow Twig Dogwood). A striking yellow branched form of dogwood much used as a contrast.
2-3 ft. 98c each; 3 for \$2.79

CORNUS SIBERICA. (Red Twig Dogwood). A useful filling shrub with clusters of fine white flowers, white berries; with branches turning to a blood red in winter.
2-3 ft. 98c each; 3 for \$2.79

FRINGE BUSHES OR TREES

WHITE FRINGE. (Chionanthus virginica) A very attractive shrub with large leathery leaves and lace-like white flowers, borne in gracefully drooping clusters. Often tree like but usually bushy to the ground.
2-3 ft. \$1.69 each; 3 for \$4.19

PURPLE FRINGE. (Rhus Cotinus) (Smoke Tree). A spreading shrub or small tree covered with large clusters of round leaves, overhung in summer by mist-like clouds of tiny flowers. These are light lavender when they first appear and give the impression of smoke from the distance when they first appear.
2-3 ft. \$1.49 each; 3 for \$3.98

HONEYSUCKLE

2-3 ft. \$.98 each; 3 for \$2.79

3-4 ft. \$1.19 each; 3 for \$3.49

LONICERA BELLA ALBIDA. (White Flowering Honeysuckle). Covered with white flowers followed by great fragrant clusters of red berries.

LONICERA FRAGRANTISSIMA. (Winter Honeysuckle). Early pink and white fragrant flowers, with its bright green foliage retained all winter if somewhat sheltered.

LONICERA MORROWI. (Morrow's Honeysuckle). A rounded spreading variety, blooms early in spring with creamy white flowers, later brilliant with a nice covering of crimson fruit.

LONICERA TATARICA RUBRA. (Red Tatarian Honeysuckle). Light crimson flowers in early summer, with abundant red fruits following the flowers.

LONICERA ZABELLI. A New honeysuckle to the gardener. Leaves are glabrous and the flowers are much redder than any of the other varieties which we have to offer. This variety is a good grower and is well used in border or group planting.

HYDRANGEA

ARBORESCENS GRANDIFLORA. (Hills of Snow). In a mass planting the large bunches of flowers resemble a bank of snow, and are in bloom from July to September. By cutting back to the crown each year they may be kept round and dense.
18-24 in. \$.98 each; 3 for \$2.79
2-3 ft. \$1.19 each; 3 for \$3.49

PANICULATA GRANDIFLORA. (Pee-Gee Hydrangea) Fine for tall hedges or may be pruned to compact round clumps. Very attractive when laden with their massive blooms which are first snow white and then pink, finally becoming reddish bronze.
2-3 ft. \$.98 each; 3 for \$2.79
3-4 ft. \$1.19 each; 3 for \$3.49

PANICULATA GRANDIFLORA, TREE TYPE. Same as above but on stem about 3 to 4 feet tall forming a bushy head with its giant showy blooms.
3-4 ft. \$2.19 each; 3 for \$5.98

Gorgeous Blue Hydrangea

NIKKO. The only hardy Blue Hydrangea which we have seen. It has withstood the last ten winters here at our nursery and during that time we recorded a temperature of 22 degrees below zero. Its flowers stay bright and fresh for a long time after blooming. The plants develop into broad clumps bearing in August a profusion of intense blue flowers. These showy plants attract attention and admiration wherever used.

2 yr. clumps \$1.69 each; 3 for \$3.98

3 yr. clumps \$2.29 each; 3 for \$5.95

HYPERICUM

AUREUM. Large brilliant double golden yellow flowers in spring on a dwarf shrub. Foliage dark green.

18-24 in. \$1.19 each; 3 for \$3.49

LILACS

SYRINGA PERSICA. (Persian Lilac). Medium growing with slender branches topped with a purple spiked flower.

2-3 ft. \$.98 each; 3 for \$2.79

SYRINGA VULGARIS. (Common Purple Lilac). The old fashioned but still beautiful light purple lilac, very fragrant and prolific bloomer.

2-3 ft. \$.98 each; 3 for \$2.79

3-4 ft. \$1.19 each; 3 for \$3.49

French Hybrid Lilacs

2-3 ft. \$2.19 each; 3 for \$5.98

3-4 ft. \$2.49 each; 3 for \$6.98

BELLE DE NANCY. Large double flowers of rose satiny pink.

CHAS JOLY. Beautiful large double red flowered lilac.

CHARLES THE TENTH. A rich purple-red. Very nice for a good single bloomer.

LEON GAMBETTA. Double, lilac rose to purplish lilac; both the individual flowers and the trusses are very large. An outstanding variety.

LUDWIG SPATHE. Darkest of the Reds, a deep purplish red shade.

PRES. GREVY. A compact flower of deep blue. Double.

PRES. POINCAIRE. An extra large flower of deep bluish purple, which does not fade when coming into full bloom. Double.

VON HORSTENSTEIN. A recent importation and well worth a trial. It produces large spikes of clear lavender flowers which have a fragrance all their own.

FRENCH LILAC, VON HORSTENSTEIN

GOLDEN NINEBARK

PHYSOCARPUS OPULIFOLIA AUREA. In habit or growth this variety is similar to the above. The foliage is golden, turning to bronze. The large white flower heads are borne in great profusion in June.

2-3 ft. \$.98 each; 3 for \$2.79

3-4 ft. \$1.19 each; 3 for \$3.49

FLOWERING QUINCE

CYDONIA JAPONICA. Scarlet flowers early in the spring followed by small quince shaped fruit that is quite fragrant. The foliage is shiny and the growth is dense, making it desirable as a planting specimen.

18-24 in. 98c each; 3 for \$2.79

2-3 ft. 1.19 each; 3 for 3.49

CRIMSON BEAUTY. An outstanding new type of flowering quince. It makes an upright bush with large double, deep scarlet blossoms and golden staymens.

18-24 in. \$.98 each; 3 for \$2.79

GOLDEN SYRINGA

GOLDEN MOCK ORANGE. Very valuable to use in contrast with green foliage shrubs. Its foliage is small, refined, and a very brilliant yellow. The white flowers are very sweetly scented.

2 yr. plants — \$1.19 each; 3 for \$3.49

3 yr. plants — \$1.49 each; 3 for \$4.29

MOCK ORANGE

PHILADELPHUS CORONARIUS. (Old Fashioned Mock Orange). Blooms in very graceful sprays in May. Flowers white and slightly scented. May be used for tall screens.

3-4 ft. \$1.19 each; 3 for \$3.49

PHILADELPHUS VIRGINALIS. (New Virginal Mock Orange). A magnificent new variety with good foliage and a compact habit of growth. The flowers are double, semi-double, and single, the flowers being of the largest, most beautiful and sweetest scented of all the mock oranges. It blooms the earliest and also the longest. It is without question the leader of the mock oranges.

2-3 ft. \$1.19 each; 3 for \$3.49

3-4 ft. \$1.69 each; 3 for \$4.95

NINEBARK

PHYSOCARPUS OPULIFOLIA. Growth upright to eight feet. It is a mass of large white flower heads in June. Very excellent for group planting or for screen use.

2-3 ft. \$.98 each; 3 for \$2.79

3-4 ft. \$1.19 each; 3 for \$3.49

RHODOTYPOS

RHODOTYPOS KERRIODES. (Jet Bead). Often called white Kerria. A well rounded shrub covered with light green leaves and large single white flowers in May. Shiny black seeds in clusters follow the flowers and remain on the plant all winter.

2-3 ft. \$1.19 each; 3 for \$3.49

SNOWBERRIES

2-3 ft. \$.98 each; 3 for \$2.79

3-4 ft. \$1.19 each; 3 for \$3.49

SYMPHORICARPOS CHENAULTI. (Pink Snow berry). A new improved snowberry with large pink berries, that are very shiny and attractive throughout the winter. Very profuse in its production of flowers and fruit.

SYMPHORICARPOS RACEMOSUS. (White Snowberry). Small pale rose colored blooms followed by large clusters of pure white berries which hang on the plant all winter.

SYMPHORICARPOS VULGARIS. (Red Snowberry). (Inlian Currant). (Coral Berry). More compact than white snowberry. The narrow oval leaves are dull red and cluster tightly together along the drooping branches, a very good plant for foundation or steep bank planting.

RUSSIAN OLIVE

ELAEAGNUS ANGUSTIFOLIA. Attractive silver gray leaves, white berries. Used frequently for hedges and windbreaks. Very hardy.
3-4 ft. \$1.19 each; 3 for \$3.49

SNOWBALL

2-3 ft. \$.98 each; 3 for \$2.79
3 4 ft. \$1.19 each; 3 for \$3.49

VIRBURNUM AMERICANUM. (American Cranberry). Covered with many bright red berries which hang on through the winter. Broad flower clusters with usually only the outer fringe fully open.

V. DENTATUM. (Arrow Wood). May and June flowers if creamy white. The fruits are bluish black and appear in autumn.

V. LANTANA. (Wayfaring Tree). Beautiful wrinkled leaves, with white flowers in May and June. The fruit varies in color from crimson to black.

V. LENTAGO. (Nannyberry). Flowers of pure white in great clusters through May and June, with large bluish black fruit.

V. OPULUS. (European Cranberry). Beautiful dense brilliant green foliage, with large bunches of crimson berries all winter. The flowers are dense clusters about four inches across and pure white.

V. STERILIS. (Snowball). The old fashioned snowball that is in full bloom Decoration Day. It's large dazzling creamy white blooms, that when planted alone or in a mass give a wonderful show.

V. CARLESI. (Fragrant Virburnum). It is usually in bloom about Memorial Day and is of added value as a cemetery plant, as the flowers last a great deal longer than the bloom on most plants.

B&B, 15-18 in. \$2.19 each; 18-24 in. \$2.79 each;
2-3 ft. \$3.69 each

SPIREA

ANTHONY WATERER. Dwarf plant with beautiful dark green foliage, well rounded shrub, with large brilliant rosy crimson flowers which last over a long season, but is at its best in midsummer.

12-15 in. 98c each; 3 for \$2.79

FROEBELI. A fast growing Anthony Waterer type in both color of flower and foliage, but attains a height of four feet.

18-24 in. 98c each; 3 for \$2.79

THUNBERGI. Forms a dense feathery bush, with pale yellow-green foliage, changing in fall to a bright red and orange. Is covered with small white flowers in early spring.

2-3 ft. \$.98 each; 3 for \$2.79

VAN HOUTTEI. The old favorite white spirea. Quite common but yet one of the best of the shrubs. A good grower with good foliage and masses of large white flowers. A perfect fountain of pure white blooms in May and June.

2-3 ft. 69c each; 3 for \$1.89; 10 for \$5.95

3-4 ft. 89c each; 3 for \$2.49; 10 for \$7.95

KOREAN SPIREA. Spectacular snowy white flowers, in late June, weigh down this spreading bush and make it outstanding in any shrub collection.

2-3 ft. \$1.19 each; 3 for \$3.49

3-4 ft. \$1.49 each; 3 for \$4.19

TAMARIX

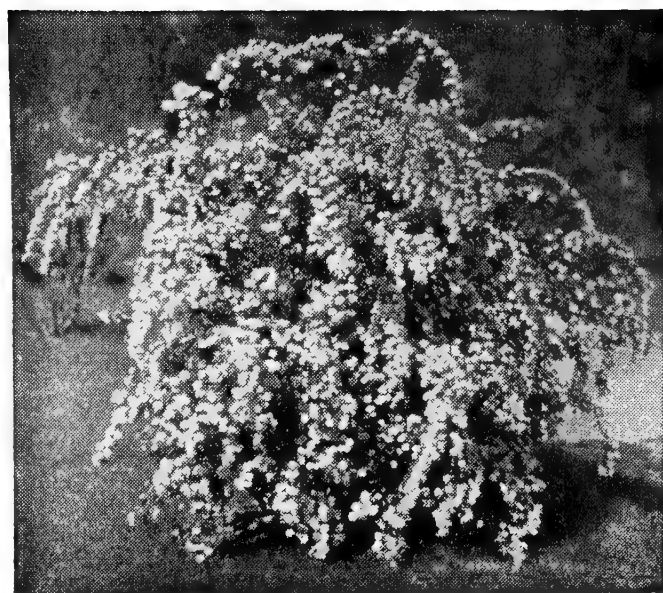

HISPIDA. (Spanish Tamarix). Very bushy with flowers in long upright panicles, bright coral pink, mid-summer. This variety blooms longest and is most used for cutting of both blooms and foliage.

2-3 ft. \$1.19 each; 3 for \$3.49

WITCH HAZEL

HAMAMELIS VIRGINICA. A beautiful large shrub or small tree sometimes attaining a height of twenty-five feet. The flowers are bright yellow and appear in winter or early spring.

2-3 ft. \$.98 each; 3 for \$2.79

SPIREA VAN HOUTTEI

BRISTOL RUBY

Pat. No. 492

(Improved Eva Rathke)

Hardier and more vigorous.

Color is a soft ruby-red shading to garnet-crimson. Makes a shapely, thrifty plant with attractive green foliage. Excellent reports from Vermont and other difficult regions fully substantiate our own estimate of its unusual hardiness.

	Each	3	12
2-3 ft.	\$1.50	\$4.00	\$15.00

WEIGELA

EVA RATHKE. The most distinct variety blooming later in July and most showy with its abundance of deep carmine flowers.

2-3 ft. \$1.19 each; 3 for \$3.49

HENDERSONI. A good rank grower and is well used as a screen plant and it often attains a height of twelve feet. A good bloomer being covered with beautiful pink flowers.

2-3 ft. \$.98 each; 3 for \$2.79

3-4 ft. \$1.19 each; 3 for \$3.49

FLORABUNDA. Very popular with its large crimson flowers and very showy when the ends of the branches are crowded with bloom.

18-24 in. \$.98 each; 3 for \$2.79

2- 3 ft. \$1.19 each; 3 for \$3.49

ROSEA. A good rank grower and is well used as a screen plant and it attains a height of twelve or eighteen feet. It is a good bloomer being covered with beautiful pink flowers.

3-4 ft. \$1.19 each; 3 for \$3.49

NANA VARIEGATED. (Dwarf Variegated Weigela). Leaves margined and streaked creamy white. A fine shrub for contrast or foreground planting. It bears many pink flowers in June.

2-3 ft. \$.98 each; 3 for \$2.79

BIG-LEAFED CHASTE TREE

VITEX MACROPHYLLA. Combines unusual beauty of foliage, with attractive spikes of lovely lavender-blue flowers, borne in upright panicles on tips of stems. Blooms profusely from July until frost.

18-24 ft. \$.98 each; 3 for \$2.79

2- 3 ft. \$1.19 each; 3 for 33 49

HEDGE PLANTS

ARTIC WILLOW

SALIX PURPUREA NANA. A new dwarf plant that will most likely become one of the leaders in this field. A blue leaf, low growing willow, suited for hedges and borders. Very hardy.

	1-9	10-49	50 or more
9 to 12 inch39	.37	.23
12 to 15 inch49	.47	.33
15 to 18 inch59	.57	.43

BARBERRIES

BERBERIS ATROPURPUREA. (Red Leaf Barberry). A brilliant accent shrub as a solitary specimen or in a close group among duller foliage. This variety starts in its spring foliage a warm bronzy red, the heat of summer bringing out a red brilliancy, with autumn adding other tints to its richness. The abundant scarlet berries persist throughout the winter. A sunny exposure is required for the best color effect.

12-18 inch—49c each; 10, \$4.49; 50, \$19.95
18-24 inch—59c each; 10, \$5.49; 50, \$22.95

BERBERIS THUNBERGI. (Japan Barberry). The ideal low hedge plant, hardy, tough and of compact growth, adapted to shearing. The leaves are a beautiful green in the summer turning to a reddish bronze in autumn and being covered with shiny red berries all winter. It is customary to plant about 12 to 15 inches apart for a thick hedge, but 2 feet is close enough where individual expression is desired.

12-18 inch—44c each; 10, \$3.98; 50, \$17.95
18-24 inch—57c each; 10, \$4.98; 50, \$19.95

DWARF NINEBARK

PHYSOCARPUS OPULIFOLIUS NANUS. A dwarf thick grower which leaves well to the ground. Grows naturally into a uniform, thick hedge, which requires very little shearing.

	1-9	10-49	50 or more
2-3 ft.79	.77	.73

BARBERRY THUNBERGI HEDGE

PRIVETS

LIGUSTRUM AMURENSE. (Amur River Privet). A hardy northern group type, upright and tall growing, the leaves a good dark green and makes an ideal hedge.

12-18 in. ..	.20	.15	.10
18-24 in. ..	.25	.19	.14

LIGUSTRUM REGALIANUM. (Regal's Privet). Strong very hardy type with dark shiny leaves. The branches are stiff and horizontally spreading gracefully, drooping at the ends.
18-24 in. 69c each; 3 for \$1.89
2- 3 ft. 89c each; 3 for \$2.49

CALIFORNIA PRIVET HEDGE

Hardy Vines

BOSTON IVY

AMPELOPSIS VEITCHI. This is one of the finest hardy climbers that we have that will cling to walls and probably the most popular. The color is bright green in summer changing to the brightest crimson and yellow in the autumn.
3 yr. Extra Heavy 98c each; 3 for \$2.79

CLEMATIS

PANICULATA. Woody climbing vines which are covered with creamy white flowers. These vines are perfectly hardy and are old favorites.

2 yr. No. 1 plants 98c each; 3 for \$2.79

JACKMANI. A very deep blue large flowered variety.

2 yr. No. 1 plants \$1.49 each; 3 for \$4.29

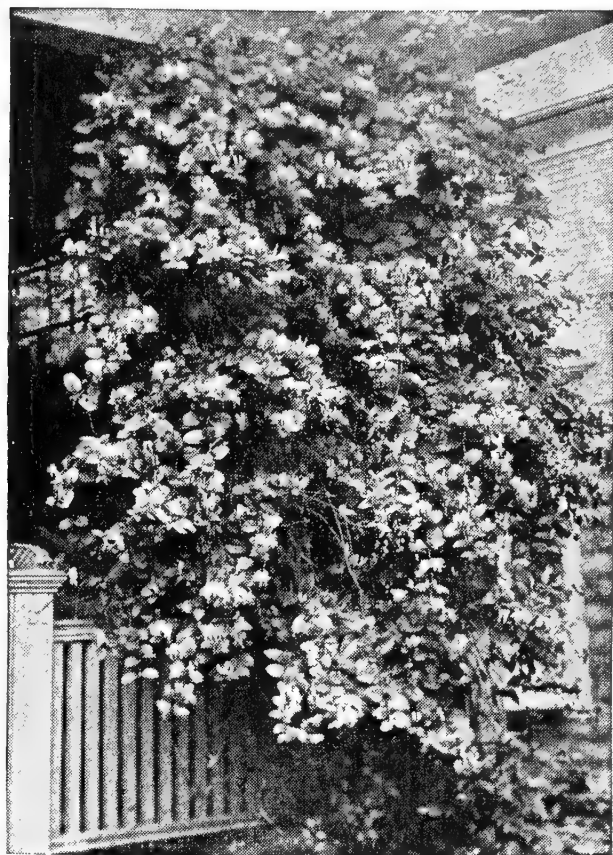

MAD. ANDRE. The best crimson red we have seen of the large flowered varieties.

2 yr. No. 1 plants \$1.49 each; 3 for \$4.29

DUTCHMAN'S PIPE

ARISTOLOCHIA DURIOR. (Sipho). The old favorite with the white pipe-like flower and the large elephant-ear leaves. Our vines are grafted to insure these fine large leaves.

2 yr. grafts \$1.49 each

HALL'S HONEYSUCKLE

HONEYSUCKLE

LONICERA HALLIANA. A very dense vine used either as a ground cover or on a wall. It has creamy white flowers.

2 yr. No 1 plants 69c each; 10 for \$5.98

LONICERA HECKROTTI. An exquisite new variety. Immense, showy clusters of trumpet-shaped buds with fragrant flowers, measuring up to 2 inches across. Outside petals brilliant flame-pink, inside a creamy golden yellow. Dark glossy foliage. Can be sheared to form a hedge or shrub or allowed to grow naturally as a vine. Blooms freely from early spring until heavy frost.

2 yr. No. 1 pants \$1.19 each; 3 for \$3.49

SCARLET TRUMPET. This outstanding vine is well recommended where the space to be covered is not too large. The most brilliantly colored of all the honey-suckles it is indeed a fine show with its many coral-red blooms backed by beautiful blue-gray-green foliage.

C 2 yr. No. 1 plants \$1.19 each; 3 for \$3.49

SILVER LACE VINE

POLYGONUM AUBERTI. A very rapid growing vine averaging 25 feet in a single season, producing a great profusion of silvery sprays from late summer into fall. The leaves are small and bright.

2 yr. No. 1 plants \$1.19 each; 3 for \$3.49

WISTERIA

WISTERIA MAGNIFICA. Noblest and oldest of the vines. Often attains a great age with large woody trunk. The long flowers which are lilac blue with faint yellow spots, hang in large racemes.

2 yr. No. 1 plants \$1.49 each; 3 for \$4.29

CLEMATIS JACKMANI

SHADE TREES

BIRCH

BETULA ALBA LACINATA. (Cut Leaf Weeping Birch). The bark is similar to the white birch in color. The tree is tall and slender, but a vigorous grower with graceful and weeping habit, together with the cut leaf foliage presents such beauty as has never been seen before in a single tree. Wonderful lawn specimen, often planted in a row to edge the drive.

6-8 ft. \$3.69 each; 3 for \$ 9.98

8-10 ft. \$4.69 each, 3 for \$12.98

BETULA ALBA. (European White Birch). A very beautiful and striking upright tree. The pearly grayish white bark makes this tree stand out when planted singly or in a group. An old favorite and without a doubt one of our finest specimens.

6-8 ft. \$3.49 each; 8-10 ft. \$4.49 each

ELMS

ULMUS AMERICANA. (American Elm). Most beautiful and stately of all our shade trees. Fast in growth with a round graceful drooping top. Indispensable as a shade tree because of its great spreading branches.

6-8 ft. \$3.19 each; 8-10 ft. \$4.29 each

ULMUS MOLINE. (Moline Elm). A valuable new type of elm of compact but rapid growing habit. It has very large leaves that are very dark blue-green in color, with the bark smooth and glossy.

6-8 ft. \$3.19 each; 8-10 ft. \$4.29 each

ULMUS PUMILA. (Chinese Elm). A type especially adapted to dry locations but does well under any normal conditions. In this section we consider it a partial dwarf because it grows so slow but it develops into a small compact tree.

6-8 ft. \$3.19 each; 8-10 ft. \$4.29 each

MAPLES

ACER DASYCARPUM. (Silver or Soft Maple). A hardy rapid growth and large size is valuable for quick shade. Its leaves are good sized light green above and silvery beneath, turning to a light red and bronze in autumn. It produces shade quicker than any other variety.

6-8 ft. \$2.49 each; 8-10 ft. \$3.49 each

ACER PLATANOIDES. (Norway Maple). A large tree with dark dense green foliage. It develops into a formal round head and produces very dense shade. A very slow grower, but one is well repaid for waiting.

1-1¼ in. \$4.69 each; 1¼-1½ in. \$5.69 each

1½-2 in. \$6.69 each

ACER SCHWEDLERI. The purple leaved Norway. Its dark leaves attract attention at all times but are unusually fine in spring, when their unusual color contrasts beautifully with the green of other trees. In autumn they gradually turn to a golden yellow.

1-1¼ in. \$5.19 each; 1¼-1½ in. \$7.49

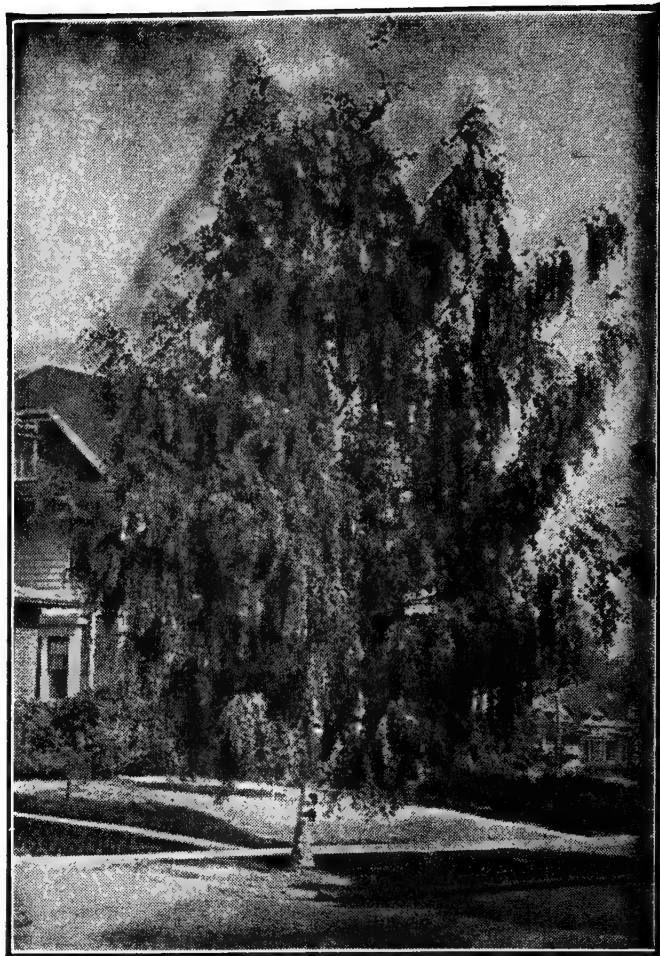

CRIMSON KING. (Plant Pat. 735). (Acer Platanoides Schwedleri nigra). This is a beautiful form of the schwedleri maple. It is a brilliant crimson and retains its color all through the summer months. One of the most outstanding ornamental shade trees ever produced.

4 yr. old trees 6-8 ft. \$6.95 each

MOUNTAIN ASH

SORBUS AUCUPARIA. (European Mountain Ash). A large ornamental tree with compound ornamental leaves; white flowers in spring and clusters of bright orange red berries in the fall. Grows to a large size. Very attractive.

6-8 ft. \$3.79 each; 8-10 ft. \$4.79 each

CUTLEAF WEEPING BIRCH

MAIDENHAIR TREE

GINGKO BILOBA. (Salisburia). An elegant ornamental shade tree that is prized for its fern-like foliage. Its angular shape and long slender limbs are unique. Imported from southern Asia.

5-6 ft. \$3.19 each; 6-8 ft. \$4.29 each

POPLAR

BOLLEANA POPLAR. Will grow quickly to a tall spire. Its leaves are glossy green, silvery beneath, creating a pleasing effect when stirred by the breezes.

6-8 ft. \$2.98 each; 3 for \$8.49

POPULUS NIGRA ITALICA. (Lombardy Poplar). Often attains the height of 100 feet or more. Old trees that were well placed when planted are today outstanding landmarks. The leaves are a rich shiny green with the under side slightly lighter. A good tree for accent.

6-8 ft. \$1.69 each; 3 for \$4.49

8-10 ft. \$2.69 each; 3 for \$7.49

WEeping WILLOW

SALIX BABYLONICA. (Weeping Willow). Tall, upright, massive in form, with its long slender branches growing straight downward. Weeping Willow is always attractive. It is especially so in summer when the pendulous branches sway gently in the breezes, and the long, slender, lustrous green leaves show a bright silver reflex. Willows grow rapidly, will thrive in wet places and like to be near water, but do not mind being planted elsewhere, as they grow heartily in almost any location.

6-8 ft. \$3.19 each; 8-10 ft. \$3.89 each

PLANE TREE

PLATANUS ORIENTALIS. (Sycamore). Often called oriental plane tree. Usually used along streets and new allotments where quick shade is required. A lofty wide spreading tree with deeply lobed leaves. The bark is grayish green in the summer, but it sheds its bark in spots, giving it a mottled appearance as the spots of its trunk that are revealed are a creamy white.

6-8 ft. \$3.19 each; 8-10 ft. \$4.29 each

Ornamental and Flowering Trees

DOUBLE FLOWERING CHERRY

The tree is covered with pink flowers; medium in size, double, and deep rose pink. Very fragrant, and very showy when planted as a lawn specimen.

3-4 ft. \$2.69 each; 4-5 ft. \$3.49 each

WEeping FLOWERING CHERRY

Weeping heads grafted on straight trunks about 6 feet tall. Flowers are small, single and pale pink.

5-7 ft \$7.19 each

FLOWERING CRABS

MALUS ELEYI. (Red Flowering Crab). The young shoots are fuzzy and covered with red foliage resembling the Japanese maple. The flowers are rich red in color and appear in clusters much like apple blossoms, followed in the fall by red fruits in large clusters which are very attractive.

3-4 ft. \$2.19 each; 4-5 ft. \$3.19 each

MALUS HOPA. (Hopa Crab). A very attractive variety of strong upright growth. It bears a profusion of very large double flowers of an unfolding rose-red. The fruits are large, edible, with a distinctive red flesh.

3-4 ft. \$2.19 each; 4-5 ft. \$3.19 each

MALUS IODENSIS PLENA. (Bechtel's Crab). The only perfectly double flowered crab. Its many delicate pink blooms appearing like small pink roses of delightful fragrance. A very popular tree and much desired for the home grounds.

2-3 ft. \$1.69 each

FLOWERING DOGWOOD

CORNUS FLORIDA. (White Flowering Dogwood). The flowers are three or four inches across and appear in great profusion in spring before the leaves are out. The foliage is grayish green and is very handsome and in the autumn turns to a rich crimson hue.

3-4 ft. \$2.19 each; 4-5 ft. \$3.69 each

CORNUS FLORIDA RUBRA. (Red Flowering Dogwood). A slow grower making small compact growth covered with large red flowers in early spring. And like the Florida its leaves turn crimson red in autumn.

3-4 ft. \$4.19 each

FLOWERING HAWTHORNS

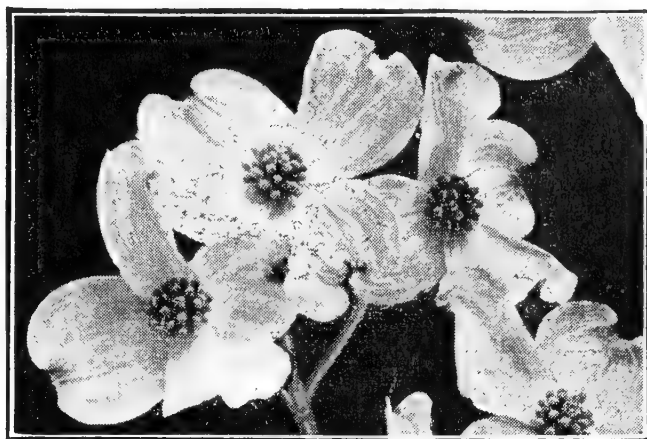

PAUL'S SCARLET. Deep crimson-scarlet, very double. This is one of the most attractive small trees for specimen planting.

3-4 ft. \$3.19 each; 3 for \$8.98

HAWTHORNS

CRATAEGUS CORDATA. (Washington Hawthorn). Especially noted for bright red berries. White blossoms in the Spring, and glossy, green foliage throughout the Summer, turning to scarlet in Autumn.

2-3 ft. \$3.49 each; 3-4 ft. \$3.79 each

CORNUS FLORIDA

FLOWERING PLUM

PRUNUS TRILOBA. The flowering plum blooms early in May, before the leaves come out. The delightful double, bright pink, flowers on every twig so thick that no wood is visible. A gorgeous sight in spring.

2-3 ft. \$1.49 each

PRUNUS CISTENA. A small tree which has small pinkish white flowers, but being used largely for its bright red leaves.

3-4 ft. \$1.69 each

PRUNUS NEWPORT. Similar to the above variety, but grows a little larger and the color of the leaves is a trifle darker, and may be used where a little larger tree is desired.

3-4 ft. \$1.69 each; 4-5 ft. \$2.19 each

FLOWERING PEACH

AMYGDALUS PERSICA. (Double Red Flowering Peach). A beautiful red flowering small tree which is indeed one of the showiest when it breaks into full bloom in the early spring. Its flowers are large and double.

3-4 ft. \$1.69 each; 4-5 ft. \$2.19 each

GOLDEN CHAIN

LABURNUM VOSSI. The golden chain is a handsome small tree with dark green leaves falling late in autumn without change of color. It has drooping racemes of bright yellow flowers in late spring, followed by long narrow pods which remain on the tree for a long time.

4-5 ft. \$3.49 each; 3 for \$9.49

MAGNOLIA

MAGNOLIA SOULAGEANA. (Saucer Magnolis). One of the hardiest and finest of all the magnolias. Its blooms are from three to five inches across, cup shaped, white and rosy violet, opening before its leaves, which are massive and glossy green.

2-3 ft. B&B \$6.19 each

RED BUD

CERCIS CANADENSIS. (Red Bud or Judas Tree). A small tree of irregular form with attractive heart-shaped leaves. When the great quantities of small rose-colored blooms appear before the leaves, it gives one the impression of a cloud of pink smoke from the distance.

4-5 ft. \$3.39 each

Evergreen Trees

ARBORVITAE

* **THUJA OCCIDENTALIS NIGRA.** (Dark Green American Arborvitae). (White Cedar). Upright, broad based dark green foliage, dense, from the ground up.

* **THUJA OCCIDENTALIS ELEGANTISSIMA.** A type very similar to the American Arborvitae, but a more compact tree of much darker green color with bright yellow tips on the leaves. This remarkable coloring from a distance gives a light yellow cast.

THUJA PYRAMIDALIS. (Pyramidal Arborvitae). A very dense columnar type, with dark green foliage, probably the most compact and erect of all the Arborvitaes.

* **THUJA OCC. SPIRALIS.** (Douglas Pyramidal Arborvitae). This variety grows very similar to the common Pyramid Arborvitae, but is somewhat broader at the base of the plant. A good hardy evergreen, free from windburn and does well in a wide variety of growing conditions. The individual branches and leaves have a twisted spiral effect.

The above plants are balled and burlapped with soil intact.

18-24 in. \$1.98 ea.; 2-3 ft. \$2.79 ea.; 3-4 ft. \$4.49 ea.

GLOBES

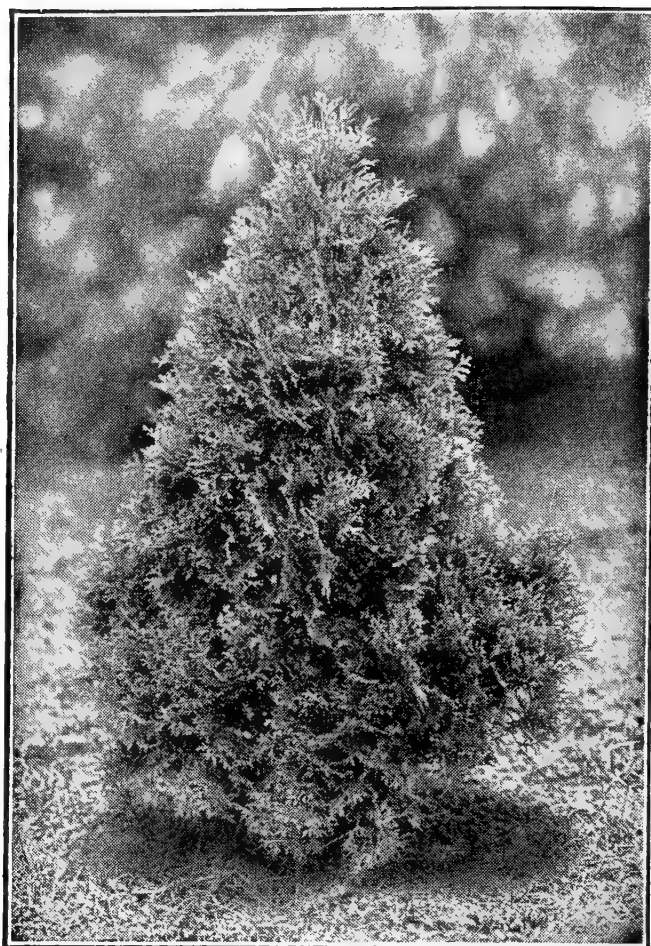

* **THUJA COMPACTA.** Dwarf dense little trees which do not require trimming and still retain their round globe shape. Balled and burlapped. Soil intact.

12-15 in., \$1.79; 15-18 in., \$2.49

HEMLOCK

TSUGA CANADENSIS. Its long branches droop gracefully to the ground and bend willingly in a faint breeze. A conical tree tapering from a broad base at the ground to a long straight thrifty shoot at the top.

2-3 ft. \$4.98 each; 3-4 ft. \$6.49 each

Pyramidal Arborvitae

BABY EVERGREENS

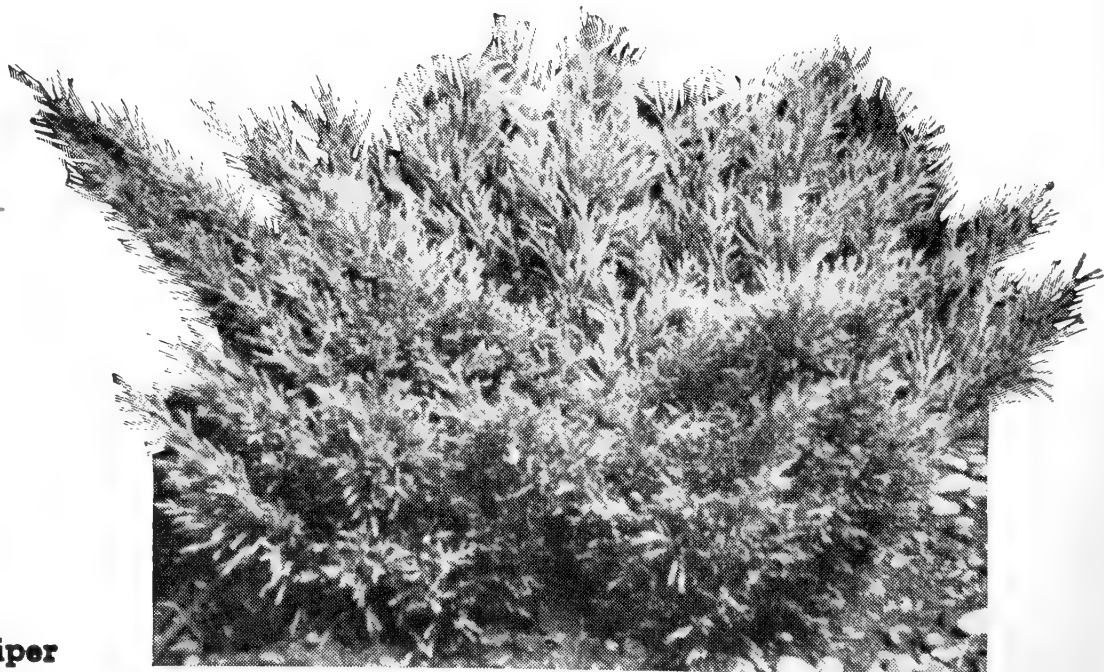

We can supply baby evergreens in all varieties which are marked *. These are dug and shipped bareroot and if planted carefully and with reasonable care should grow and do well. These are the sizes which we plant into our nursery and grow into specimen plants for the landscape trade.

1 yr. rooted cuttings from the greenhouse—1-9, 29c; 10-49, 27c; 50 or more, 23c. 2 yr. 5-7 inch—1-9, 39c; 10-49, 37c; 50 or more, 33c. 3 yr. 8-10 inch—1-9, 59c; 10-49, 57c; 50 or more, 49c.

Spring planting time begins about the middle of March and continues throughout April and May. Fall planting begins in October and continues throughout November.

Please send your order in as soon as you receive this catalogue. We will ship at the proper planting time. After you are through with this catalogue we would greatly appreciate it if you would pass it to a friend or neighbor that might want to order also.

Pfitzer's Juniper

JUNIPERS

JUNIPERUS BURKI. (Silver Cedar). Soft twilled foliage densely covers a rather narrow and symmetrical pyramid, the color so richly silver that it stands out like a rare gem. Very hardy.

3-4 ft. \$6.19 each

JUNIPER, CANNARTI. Deep lustrous green. Tufted foliage is the distinguishing charm of this hardy and very fine evergreen — holding its rich color the year through. Great favorite for landscaping, developing a beautiful pyramid form. Some trees bear shiny blue berries which remain on the plant most of the winter.

3-4 ft. \$6.19 each

JUNIPER, GLAUCA. (Blue Cedar). This well known variety is a popular favorite because of its silvery-blue color. When the new growth comes out in the spring it is steel blue in color and sets the plant off to a great advantage.

3-4 ft. \$6.19 each

* **JUNIPER, PFITZER'S.** Exceptionally beautiful, graceful and hardy. No wonder it is the most popular of all dwarf evergreens. Handsome, feathery, gray-green foliage covers arching, spreading branches as it develops a broad, picturesque form. Resistant to city dust and smoke. Maturity spread 4 ft.

15-18 in. \$2.60; 18-24 in. \$3.69, each

TAXUS - YEW

* **TAXUS ANDERSONI.** Our newest creation of the Spreading Yew family. Resembles *Taxus Cuspidata* in growing habits, but sporting a slightly smaller leaf and maybe just a shade lighter. Can be used in border plantings especially beneath lovely picture windows. Will grow almost anywhere, shade or sun, in smoke and dirt.

15-18 in. \$3.69 each; 18-24 in. \$5.19 each

* **TAXUS CUSPIDATA.** A compact, spreading variety; dark green foliage; scarlet berries in autumn. Can be trimmed or will grow to 6 feet.

* **TAXUS CUSPIDATA CAPITATA** (Capitata Yew). A broad Pyramid type used where a broader specimen or hedge is desired than with Hicksi.

18-24 in. \$5.49; 2-2½ ft. \$6.49; 2½-3 ft. \$7.98

* **TAXUS HATFIELDI.** This new upright yew resembles the Hick's yew somewhat, usually growing with several upright perpendicular stems with the top slightly more broad than the bottom. The color is extremely dark green. The foliage is very heavy and luxuriant. Hardy in every respect.

12-15 in. \$2.98 each; 15-18 in. \$3.89 each

* **TAXUS HICKSI.** Beautiful, dense, columnar form; bright red berries in the fall. Does well under any circumstances. Used in place of the favorite pyramidal *Arborvitae*.

12-15 in. \$2.98 each; 15-18 in. \$3.89 each;
18-24 in. \$5.19 each

* **TAXUS INTERMEDIA.** At first it closely resembles the old Dwarf Japanese Yew (*Taxus cuspidata nana*) as it has the same heavy, deep green waxy foliage. It is, however, a much faster grower, due perhaps in part to the fact that it starts to grow a week or ten days earlier than other Yews.

12-15 in. \$2.98 each; 15-18 in. \$3.89 each
18-24 in. \$5.19 each

RETINOSPORA

* **PLUMOSA.** Upright with green foliage giving the appearance of a very large mass of plumes. Very attractive when these graceful branches are being tossed slightly in a breeze.

2-3 ft. \$3.19 each

* **PLUMOSA AUREA.** A very beautiful, compact plant with its golden yellow foliage, which is soft and plume-like. A good plant to use in a mass planting as its yellow color shows up to an advantage over green evergreens.

2-3 ft. \$3.19 each

Retinospora Plumosa

BROADLEAF EVERGREENS

CHINESE AZALEA

AZALEA MOLLIS. A small bushy plant covered in spring with large bright pink or yellow flowers. Very desirable for cemetery planting as it is usually in bloom over Memorial Day.

12-15 in. B&B \$2.79; 15-18 in. \$3.49
18-24 B&B \$4.49

BOXWOOD

BUXUS HANDSWORTHII. (Handsworth Box). Without a doubt the best of the boxwoods in this section. It is hardy here and with its beautiful dark green foliage makes a beautiful dwarf hedge.

10-12 in. B&B \$3.00 each

EUONYMUS

COLORATUS. (Purple Leaf Creeping Euonymus). A purple leaf form of E. Radicans. This plant carries a rich green color throughout the summer and in the autumn turns to a purplish-red color which remains with it until spring. A wonderful plant for mass planting on banks and on stone-work.

18-24 in. 4 yr. Extra Heavy plants
\$1.19 each; 3 for \$3.49

PATENS. (Sieboldi). A spreading evergreen shrub with bright green foliage which carries the rich green color throughout the year. Best used in group planting and is an ideal plant for border work.

18-24 in. \$1.49 each; 3 for \$4.29

VEGETUS. (Big Leaf Wintercreeper). Bushy with round dull green leaves. This plant is a sight in winter when it is covered with its bright scarlet fruit.

15-19 in. \$1.49 each; 3 for \$4.29
18-24 in. \$1.98 each; 3 for \$5.49

JAPANESE PIERIS

PIERIS JAPONICA. This plant creates attention wherever used. The glossy green leaves appear crowded at the ends of the branches. The graceful clusters of creamy white flowers appear in April and are very fragrant.

12-15 in. B&B \$4.00 each

EUONYMUS VEGETUS

CHINESE AZALEA

OREGON HOLLY GRAPE

MAHONIA AQUIFOLIA. Another very attractive plant with holly-like leaves. This plant blooms with clusters of bright yellow flowers in the spring, followed by handsome clusters of shining blue berries which look like miniature grapes.

15-18 in. B&B \$3.49; 18-24 in. B&B \$4.49

HOLLY

ILEX CRENATA BULLATA. (Convexleaf Japanese Holly). The glossy small, convex leaves are so numerous that the twigs are invisible. As an accent plant it is unexcelled and planted in group plantings it blends well. It is semi-formal. It is also beautiful as a dwarf hedge.

12-15 in. B&B \$3.50 each

ILEX CRENATA LATIFOLIA. (Bigleaf Japanese Holly). Large glossy leaves contrasted with the lighter gray green bark makes this plant a beauty where ever used.

15 18 in. B&B \$4.00 each

ILEX CRENATA ROTUNDIFOLIA. Similar to the above with more round leaves, thicker and more compact.

15-18 in. B&B \$4.00

ILEX GLABRA. (Inkberry). A loose spreading shrub maturing at 3½ ft. The shining dark green leaves and small dark berries make it outstanding. Is excellent in shady spots.

15-18 in. B&B \$4.00

Seeds

. . . for the Market and Home Gardener

We are able to supply many varieties which we do not list. We can also supply seeds in packets or in 100 pound lots. We try to supply a top quality seed at a fair price.

ATTENTION, MARKET GARDENERS: Send us the list of seeds you want to plant and we will quote special prices.

NOTICE — If the amount of your Seed Order is less than \$2.00 please add 20% to cover packing and postage.

BEANS — DWARF OR BUSH WAX

Pkt. 15c; ½ Lb. 39c; Lb. 59c; 2 Lbs. 89c; 10 Lbs. \$3.98

PENCIL POD WAX. 55 days. Pods are blight yellow, fleshy, brittle, stringless, and of unexcelled quality.

GREEN PODDED BUSH BEANS

STRINGLESS BLACK VALENTINE. 53 days. Pods oval, nearly straight, stringless and of fine quality.

TENDERGREEN. 54 days. An outstanding variety for home gardens, canning and freezing. Pods long, round, straight, stringless and of fine quality.

POLE OR RUNNING BEANS

KENTUCKY WONDER. 65 days. Pods long, round and heavily indented. A good climber.

BEANS — BUSH LIMA

HENDERSON'S BUSH LIMA. (Baby Lima). 65 days. Popular as an early home garden variety. Pods short, flat, containing 3 to 4 small oval beans. Green shell beans of excellent quality.

Pkt. 15c; ½ Lb. 39c; Lb. 59c; 2 Lbs. 89c; 10 Lbs. \$3.98

FORDHOOK No. 242 (Improved Fordhook Bush Lima). 76 days. Recommended for shipping and for home and market gardens.

Pkt. 15c; ½ Lb. 44c; Lb. 69c; 2 Lbs. \$1.19; 10 Lbs. \$5.49

POLE LIMA BEANS

FLORIDA BUTTER, SPECKLED. 85 days.

Pkt. 15c; ½ Lb. 39c; Lb. 59c; 2 Lbs. 89c; 10 Lbs. \$3.98

BEETS

DETROIT DARK RED. 60 Days.

Pkt. 10c; oz. 19c; ¼ lb. 49c; ½ lb. 79c; lb. \$1.49

BROCCOLI

DeCICCO. 60 Days.

Pkt. 10c; ¼ oz. 19c; ½ oz. 29c; oz. 49c;
¼ lb. \$1.69

CAULIFLOWER

EARLY SNOWBALL. 55 Days. Early and very even in time of maturity.

Pkt. 10c; ¼ oz. 49c; ½ oz. 89c; oz. \$1.49

Stringless Black
Valentine Beans

CABBAGE

Pkt. 10c; ½ oz. 29c; oz. 49c; ¼ lb. \$1.69

FERRY'S ROUND DUTCH. 71 Days. Heads almost ball shaped, commonly 7 to 8 inches in diameter, firm and of high quality.

FERRY'S PREMIUM LATE FLAT DUTCH. 100 Days. Heads very large and flat, but deep.

JERSEY QUEEN. (Yellow resistant). 62 Days. Exceptionally resistant to yellows. The first of the resistant strains to mature.

WISCONSIN ALL SEASON. (Yellows resistant). 90 Days. Heads large, commonly 10 to 12 inches across.

DO IT NOW! Send in your list of Seeds now and when you are ready to plant your garden, you will have them and valuable time will be saved. **ORDER NOW.**

CARROTS

CHANTENAY RED CORED. 70 Days. Flesh fine grained and tender of sweet delicate flavor.

Pkt. 10c; oz. 29c; $\frac{1}{4}$ lb. 59c; $\frac{1}{2}$ lb. 98c; lb. \$1.69

ALASKA, WILT RESISTANT. 58 Days. Seeds small round, medium green with bluish cast. Strain has now replaced the original type.

LITTLE MARVEL (improved strain). 64 Days. Seeds medium sized, squarish, distinctly wrinkled, green, interior green.

MORSE'S PROGRESS No. 9. 60 Days. A large podded, early dwarf variety. It carries a definite resistance to Fusarium wilt.

PREMIUM GEM. 62 Days. Pods medium green, plump, straight, blunt-ended.

THOMAS LAXTON. 60 Days. Pods borne singly, deep green, plump, broad, blunt ended.

PEPPER

CALIFORNIA WONDER. 72 Days. (sweet). Flesh extremely thick and firm. Sweet throughout and of distinct flavor.

SWEET YELLOW. Golden yellow skin and meat sweet and mild.

Pk. 10c; ¼ oz. 29c; ½ oz. 49c; oz. 79c; ¼ lb. \$2.49

PUMPKIN

LARGE YELLOW or CONNECTICUT FIELD. 120 Days. Fruits very large, flesh thick, coarse, sweet and deep yellow.

SUGAR or NEW ENGLAND PIE. 115 Days. Rich, reddish orange, rind hard, flesh thick, orange yellow.

Pk. 10c; oz. 19c; ¼ lb. 59c; ½ lb. 89c; lb. \$1.59

RADISH

EARLY SCARLET GLOBE MEDIUM TOP. 23 Days. Color rich bright scarlet, flesh white, mild, crisp.

ICICLE. 30 Days. The best early white variety.

Pk. 10c; oz. 19c; ½ lb. 69c; lb. 98c; 5 lbs. \$4.29

SQUASH

BLUE HUBBARD. A good large hubbard with blue shell.

HUBBARD. 105 Days. Flesh very thick, deep orange yellow, fine grained and dry.

TABLE QUEEN (Acorn or Des Moines). 80 Days. Dark green, flesh light yellow, bakes dry and sweet.

Pk. 10c; oz. 19c; ¼ lb. 59c; ½ lb. 98c; lb. \$1.79

SPINACH

NEW ZEALAND (Tetragonia). 55 Days. Distinct from other kinds of spinach, and valuable for culture in hot dry weather.

Pk. 10c; oz. 19c; ¼ lb. 49c; ½ lb. 79c; lb. \$1.29

TURNIP

PURPLE TOP WHITE GLOBE. (Market Gardener's strain). 55 Days. Roots globular, smooth, bright purplish red above, white below.

Pk. 10c; oz. 29c; ¼ lb. 49c; ½ lb. 79c; lb. \$1.19

TOMATO

EARLIANA. 64 Days. Particularly valuable for home and early market. Our strain is definitely superior in earliness and quality. Fruits medium sized, flattened globe shape, deep scarlet red, firm and smooth.

Pk. 10c; ½ oz. 39c; oz. 69c; ¼ lb. \$2.39

BONNIE BEST. Bright deep scarlet red, medium large, flattened globe shaped, smooth and firm.

Pk. 10c; ½ oz. 39c; oz. 69c; ¼ lb. \$2.39

MARGLOBE. 75 Days. Definite disease resistance recommends this variety for use in sections infested with *Fusarium* wilt and nail-head rust. Plants thrifty and heavily productive with long bearing season. Fruits uniform deep scarlet, large, uniformly globe shaped, smooth, solid.

Pk. 10c; ½ oz. 29c; oz. 49c; ¼ lb. \$1.69

OX HEART. 100 Days. Very popular late home-garden variety. Fruits very large often weigh 1 to 2 pounds or more. Heart-shaped, pink, flesh solid with few seeds, of mild flavor, and very choice for salads.

Pk. 10c; ½ oz. 59c; oz. 98c; ¼ lb. \$3.69

PONDEROSA. (sometimes called Beefsteak). 90 Days. One of the best for home use. Fruits deep purplish pink, extremely large, commonly 9 to 12 ounces each; deep but flat, very fleshy but with few seeds. Very mild non-acid flavor.

Pk. 10c; ½ oz. 59c; oz. 98c; ¼ lb. \$3.69

STOKESDALE. 70 Days. A second early scarlet fruited variety maturing about a week earlier than Marglobe. Plant rather open in habit, with medium heavy foliage. Fruits large globe or subglobe, smooth and well colored.

Pk. 10c; ½ oz. 29c; oz. 49c; ¼ lb. \$1.69

To plant a tree, to watch its buds swell and break into blossoms, or to discover the first fruit on a young tree—these are a few of the exciting adventures which are waiting for you.

Unlike other home furnishings and decorations which gradually wear out, trees and plants become more beautiful and their value increases from year to year. I have often heard real estate men say that to take an unplanted house and plant it well with one to two hundred dollars worth of good plants that you can easily add 1000 dollars to the selling price.

GRASS SEEDS

FERRY'S FINE MIXED

This Superior lawn grass mixture contains no timothy or bunch grasses, often found in grass mixtures. It has been thoroughly tested and found by Ferry-Morse to be the ideal grass mixture for average conditions. If your ground has been properly prepared, this seed should give you a lawn of luxuriant green turf that will be a joy to own.

Lb. \$1.19; 5 Lbs. \$5.19; 10 Lbs. \$9.98

EXTRA FINE MIXED

This one is used for a beautiful close turf. Each variety of seed used in this mixture has a different period of luxuriant growth for keeping your lawn in excellent condition all summer.

Lb. \$1.89; 5 Lbs. \$8.49; 10 Lbs. \$15.98

SHADY LAWN MIXED

This is made up of grasses that thrive in the shade of trees, buildings, or other places where there is little sun. Consists principally of Chewing's Fescue and other grasses especially suited to these conditions.

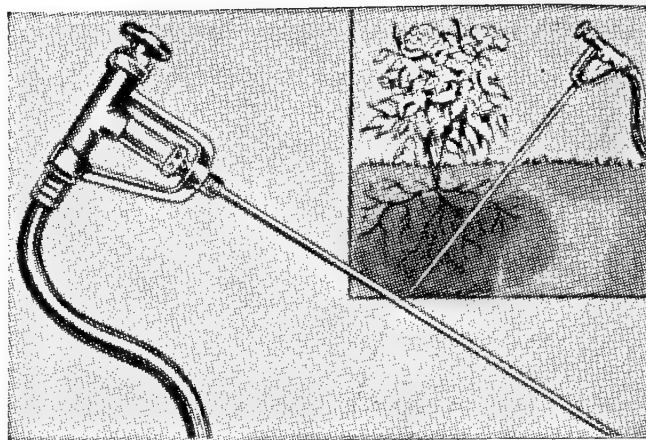

Lb. \$1.69; 5 Lbs. \$7.98; 10 Lbs. \$15.19

ROSS ROOT FEEDER

- FOR WATERING
- FOR FERTILIZING

\$3.50 EACH
POSTPAID

with one dozen regular fertilizing
cartridges

The Ross Root Feeder puts the fertilizer and water directly to the Roots. Produces healthier and more vigorous growth. Especially fine for roses, shrubs and trees. You can fertilize and water at the same time or you can just water. Needed all season. In the spring it is a quick booster for old and new plantings. In the summer insures food and water during dry spells. In the fall very necessary to put moisture down at the roots to prevent winter damage.

Simple, easy to use, nothing to get out of order and lasts for years. For watering, just attach to hose. For fertilizing, place cartridge in the chamber, attach to hose and turn on the water. Push it into the ground to desired depth. No water or fertilizer is wasted. Feeder puts it **DOWN AMONG THE ROOTS WHERE IT IS NEEDED.**

Keep a supply of cartridges on hand. Box of 12 for \$1.00 Postpaid. Regular cartridge (8-16-8) is used for most plants, shrubs, roses, trees.

Acid cartridge (10-20-20) is used for evergreens and acid loving plants like Azaleas, Blue Hydrangea, etc.

HYPONEX

Hyponex is a clean, odorless and soluble powder, using only one teaspoonful with one gallon of water. One pound makes 100 gallons of liquid plant food complete and balanced; yet because it is a powder it can be stored or transported easily and there is no spoilage, for it keeps indefinitely.

Hyponex is extremely valuable for growing plants in the house. It does not matter if the soil around your plants may be impoverished, for Hyponex will grow your plants in sand, cinders or even the poorest soil.

With Hyponex and water, plants grow luxuriantly, flower abundantly and develop sturdy growth regardless of the poorness or sterility of the soil.

1 Lb. Can \$1.29 Postpaid

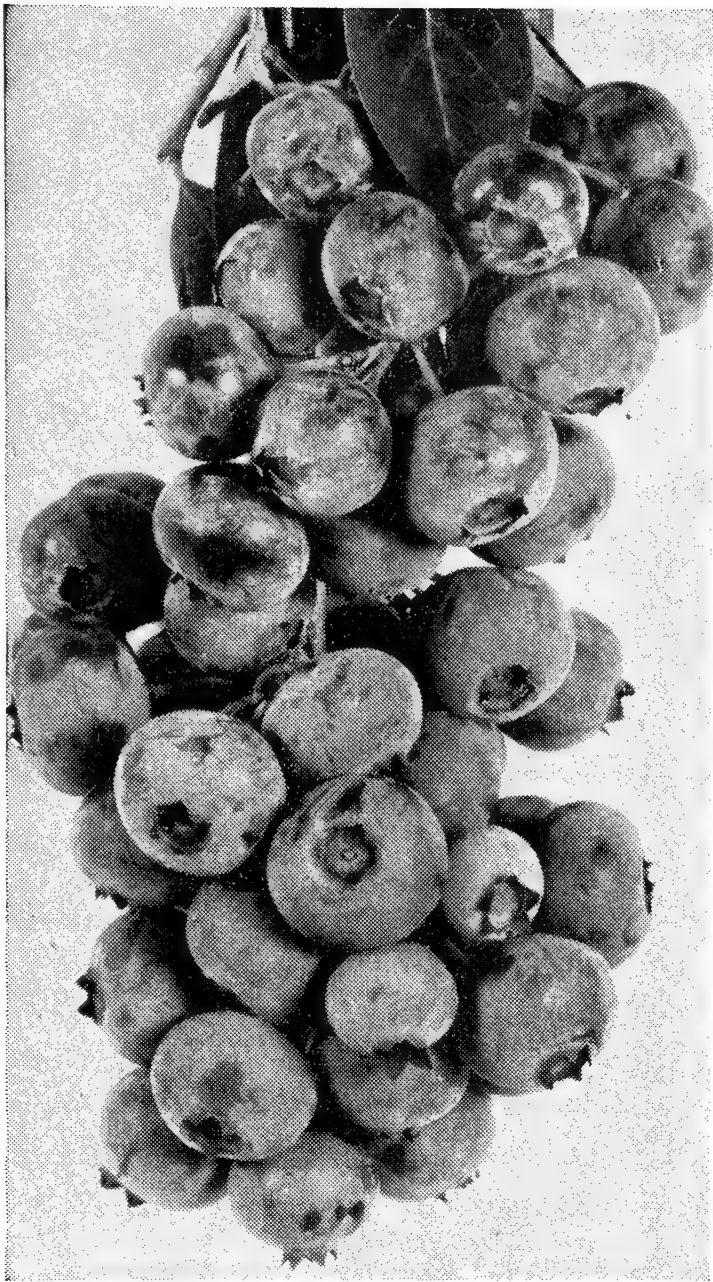

RA-PID-GRO

“The Complete Formula For A Liquid Plant Food” For Better Flowers, Better Lawns, Better Shrubs and Trees, and Better Gardens.

THE MIRACLE PLANT FOOD —WHY?

Because within 48 hours after application, you can see your Trees, Roses, Shrubs and Plants grow and improve and it is so easy to use. You simply put RA-PID-GRO in water in a pail or sprinkling can, then pour it around the stock you wish to fertilize. We realize the soil in most yards is not as fertile as it should be, RA-PID-GRO will overcome this and you will be greatly pleased at the increased growth you get. It is marvelous for invigorating lawns. Instructions on every package.

Champion's RASPBERRY PLANTS

REGISTERED

BLACK RASPBERRIES

Once again we can supply REGISTERED BLACK RASPBERRY PLANTS. These plants are grown and REGISTERED by the Ohio Small Fruit Improvement Association, Inc.

Given proper isolation from outside disease sources and given proper cultural care REGISTERED PLANTS will produce for you a healthy, high yielding raspberry plantation which will remain profitable for 8 to 10 years. You will not need to start a new patch every 2-3 years. Raspberries are now a very profitable crop if you start right with REGISTERED PLANTS.

FOR roadside sales or city market raspberries offer growers a quick money crop, always profitable.

BRISTOL. A new variety which is among the best. A heavy yielder of attractive high quality berries. The bushes are hardy and vigorous with the crop ripening just ahead of Cumberland.

CUMBERLAND. Black, large and productive, firm and a good shipper. Mid-season.

NEW LOGAN. Earlier than Cumberland and picks heavier over a short season. Resistant to drought and will often produce a crop when other varieties fail. It is also somewhat disease resistant.

NEW MORRISON. A giant new black raspberry nearly an inch in diameter. Mid-season, rapid grower, producing enormous crops often where others fail, adapted to a wide range of soils. Disease and drought resistant.

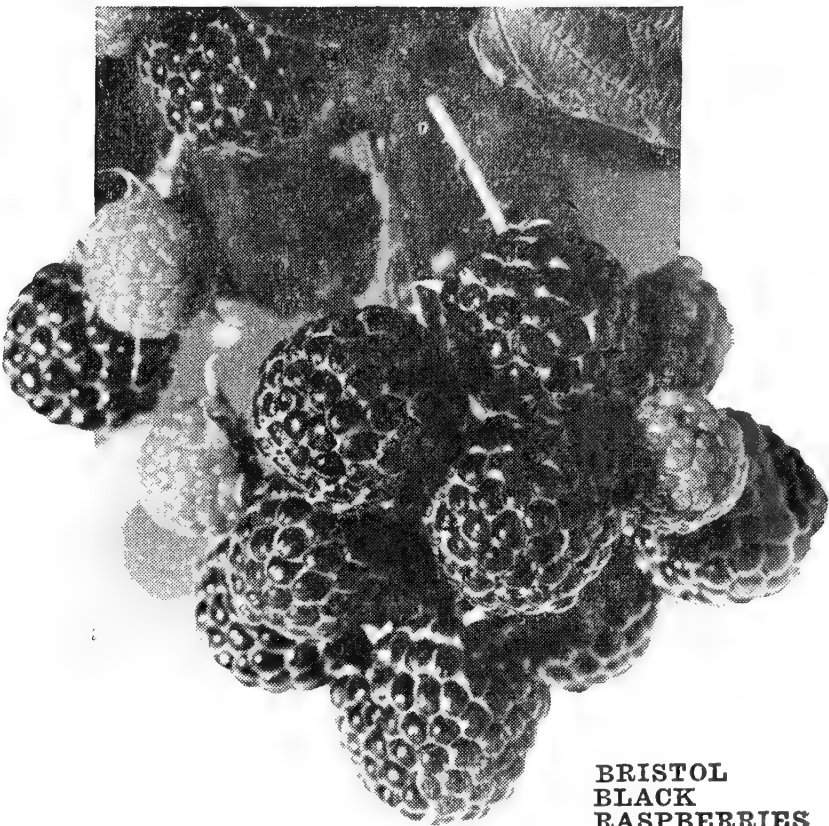

EVERBEARING RASPBERRIES

Indian Summer

Indian Summer seems to be meeting with general favor. The berries are much larger than other so-called everbearing raspberries, roundish, conical, medical red, slightly crumbly and of excellent quality. The summer crop ripens very early; the autumn crop from September on to frost. Plants are hardy, vigorous, about medium height, and bear heavy crops.

BRISTOL
BLACK
RASPBERRIES

LATHAM

... Tremendously Productive
RED

Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark, rich red.

NEWBURGH

RED

A new outstanding red raspberry. The fruit is very large, firm and does not crumble. In keeping and shipping qualities it has no equal. The plants are vigorous, hardy and productive.

SUNRISE

Red

The color is bright red but turns dark red on ripening. They are firm, fine textured, juicy, non-crumbly, mild sub-acid in flavor with a good Raspberry aroma, and better in quality than Latham.

Official records of picking dates show SUNRISE to be 10 to 16 days earlier than Latham.

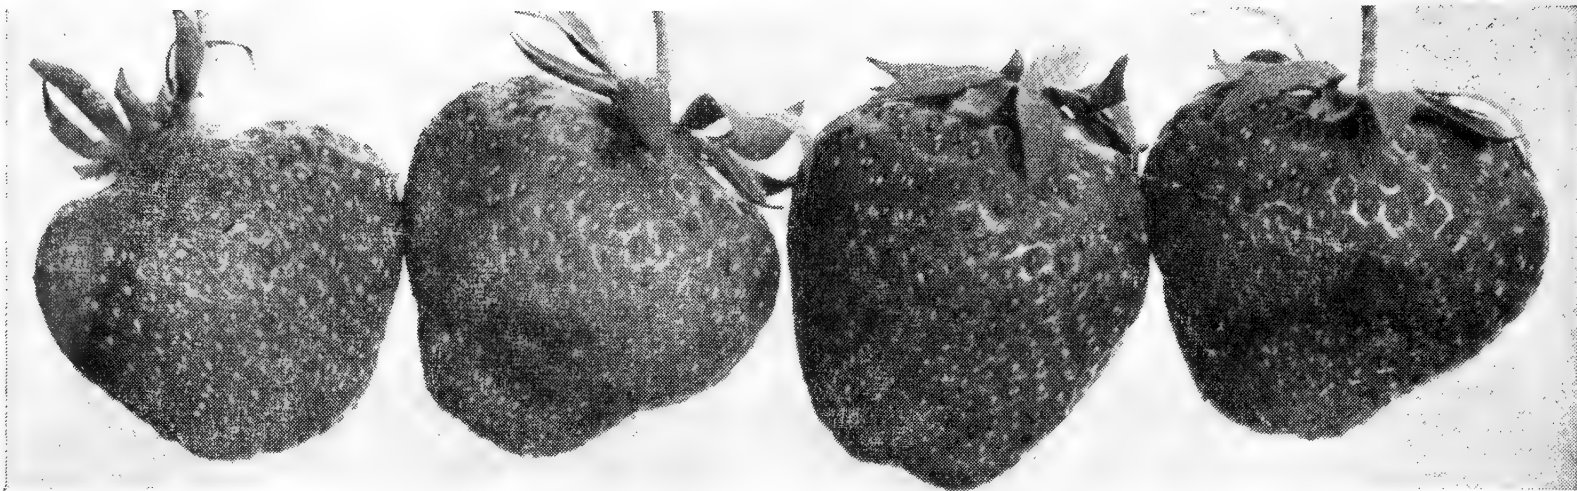

SODUS

PURPLE

The outstanding purple raspberry on the market today. The berries are large, firm, medium, purple and of good quality. It ripens shortly after Latham.

PREMIER

CATSKILL

FAIRLAND

FAIRFAX

Strawberries

healthy root system. We also have winters below zero which gives our plants their frost proof qualities.

BLAKEMORE

Early, solid and productive. A great shipping berry. Highly recommended for southern Ohio, but is well worth a trial in central and northern Ohio.

CATSKILL

Plant Catskill to follow Premier. It is the next best berry in sections where Premier is king. The berries are large and of a very good quality. In some areas it is more productive than Premier.

FAIRPEAKE

Fairpeake is as good to eat as Fairfax. A very vigorous plant, growing a little taller than Fairfax and with larger leaves. It blooms late and therefore unlikely to be injured by frost.

PREMIER

Still the king of the strawberries in this part of the country. Under favorable conditions Premier has often produced 10,000 quarts per acre of good marketable fruit and higher yields have often been recorded.

DORSET

In sections where Dorset is at its best, there is no better berry. It is susceptible to frost injury and is known as a weak pollinizer.

DUNLAP (Senator)

The berries are beautiful crimson color, large, firm and quite pointed. Its firmness makes it possible to be shipped to distant markets.

FAIRFAX

The royal quality of Fairfax makes it an excellent fruit for home use and roadside market. It is one of the best for the deep freeze.

FAIRLAND

A new variety released by the U.S.D.A. A very vigorous grower, making plenty of healthy plants that are resistant to Red Stele. The plants are very productive, ranking with Premier and Catskill in total yield.

ROBINSON (Scarlet Beauty)

A free plant maker being vigorous and free from disease. The berries are large and are quite deeply furrowed or ridged. This berry seems to be much better in some sections than in others.

SPARKLE

Sparkle has everything a fine berry should have except size and in some sections the

fruit is of a good size. Sparkle is highly resistant to Red Stele.

TEMPLE

This is a fine variety which is resistant to Red Stele. It is the rankest and most vigorous grower of all present day varieties. It is very productive, berries medium to large and of a very good quality.

Prices of Strawberry Plants

EVERBEARING STRAWBERRIES

SUPERFECTION

This new everbearer was originated in northern Michigan by the man who discovered the already famous Gem. Berries are large, fine in texture and withstand long distant shipping without discoloration or softening. You will have plenty of ripe berries ninety days after planting. It is an exceptionally heavy yielder.

NEW STREAMLINER

This berry is of enormous size, nearly round in shape; brilliant red in color, and with a delicious honey sweet flavor. Our supply is somewhat limited and if you desire to try some of these fine berries place your order early.

GEM

Surpasses other Everbearing varieties in that it thrives in all soils and throws out plenty of "runner plants" thus making a heavy fruiting row which begins to bear fruit six months after planting. A berry with few seeds and outstanding in flavor, lacking the acidity of most other everbearers.

Prices of Everbearing Varieties

Grape Vines

THERE is real satisfaction in seeing your vineyards and orchards thrive and bear abundantly. With the aim of developing and propagating the best and most profitable varieties of grapes and other fruits, we offer the following list. Given good care grapes bear well on almost any soil. They prefer a sandy or gravelly loam.

AGAWAM. Very large with thick skin and sweet flavor. Red. Ripens late.

BRIGHTON. Large of good flavor. A fine early red grape.

CACO. Fruit very large in handsome complete bunches, a rich wine-red over amber, very large bearer. Its flavor is sweet and distinctive. Mid-season.

CATAWBA. When fully ripe they are a large dark copper colored fruit, which requires a long season. Ripens in late fall.

CONCORD. The standard blue grape and probably the most extensively grown grape in the U. S. When fully ripe it is almost black. Ripens in early fall.

DELAWARE. The old fashioned small red dessert grape, but is unexcelled for flavor either of the grape or juice. Ripens early.

FREDONIA. A new productive, very black grape, ripening with Portland. The bunch and berry are large with excellent flavor, and ripens about ten days ahead of Moore's Early and is an excellent shipper as it does not crack. This grape fills a long-felt need. A juicy, delicious black grape on a vigorous and productive vine.

NIAGARA. Clusters of large and handsome pale yellow berries. It ripens with Concord and is the best white grape for the home market.

PORTLAND. A new white grape. Ripens earlier than any other known grape, which permits its being grown over a wide range of territory. The berries are large and have that beautiful yellowish color like Niagara. It has all of the good qualities that a grape should have. The quality is excellent and it is equal to the Niagara and other large grapes. It contains much sugar and can be eaten before fully ripe.

Concord Grape

GOLDEN MUSCAT

This comparatively new variety requires a season fully as long as Concord, but deserves a good trial wherever it has a possible chance to ripen. Valuable for home use and roadside market. The berries are large and meaty, having very few seeds, usually one or two, which are easily separated from the pulp. It makes a large, pyramidal, compact, well-filled cluster.

98c each; 3 for \$2.79

SEEDLESS CONCORD

A new grape that is fast proving a favorite with the home owner. Of high quality being unexcelled when eaten out of hand. The home garden is not complete without this outstanding grape.

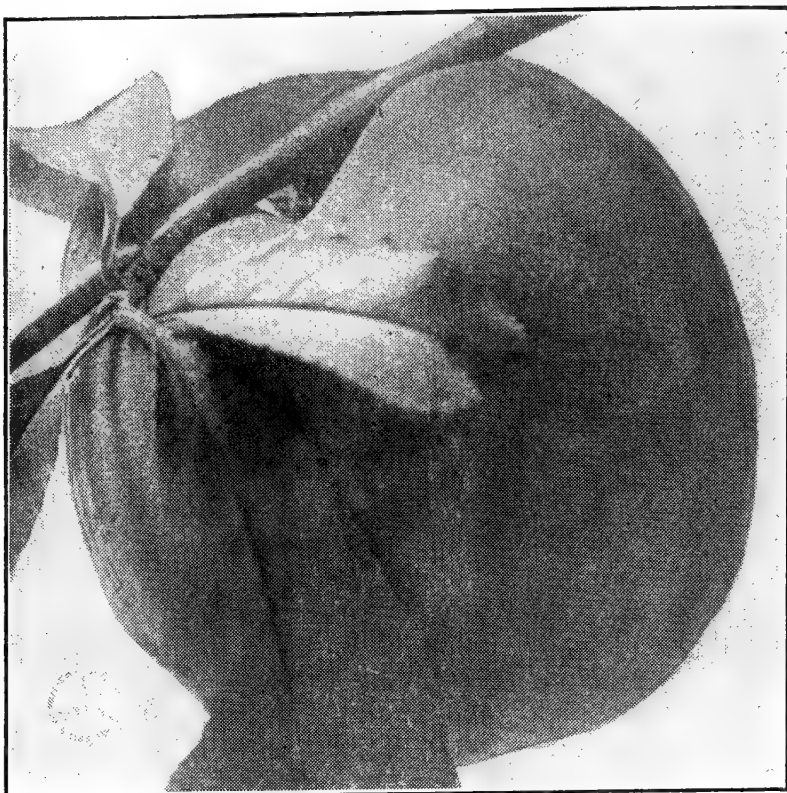

98c each; 3 for \$2.79

SENECA

Commonly called the skinless grape. Golden honey colored, flavor sweet and delicious. Vine is vigorous and very productive. A fine grape for storage.

98c each; 3 for \$2.79

JUMBO FRUIT TREES

For several years the demand has steadily increased for larger, nicer, and quicker bearing trees. We now offer them in limited quantities. These are called **JUMBO** trees as it is often possible to reduce the time from planting until you pick your first fruit, from one half to three quarters of the time required by most regular grade nursery trees. The **SUPPLY** of these "Jumbo" trees is limited and if you are anxious to make use of this wonderful opportunity we would suggest that you fill out the enclosed order sheet at once so you will be sure to receive your **ORDER** of "Jumbo" trees which will be shipped to you at the correct planting time or you may specify the shipping date.

4 - in - 1 Apple Trees

4 VARIETIES ON ONE TREE

These are the same as 5-in-1 but having one less number of varieties. These Multiple Variety Trees are not only practical for the home garden or lawn, but are new, interesting and the average grower takes pride in showing them to his friends.

3 or 4 yr. Jumbo size \$3.98
2 to 3 yr. $1\frac{1}{8}$ in. and up 2.98

3 - in - 1 Apple Trees

3 VARIETIES ON ONE TREE

Consists of 3 choice varieties ripening at different seasons furnishing fresh fruit over a longer period at very little extra cost. Multiple Variety Trees are usually more prolific than trees of a single variety as they provide excellent cross pollination.

3 or 4 yr. Jumbo size \$2.98
2 or 3 yr. $1\frac{1}{8}$ in. and up 2.49

3 - in - 1 PEAR TREES

A new practical novelty, these trees are copied after the 5-in-1 Apple trees, but with only three varieties budded onto a Bartlett tree.

The three varieties, Seckel, Duchess, and Gorham, budded onto Bartlett gives you FOUR of the finest pears anyone could want.

These are fine for the planter with limited space or the person who enjoys having something different and new to show their friends.

We have only a small and limited supply this year, so please order yours early so that we can save one for you.

PRICES OF 3-IN-1 PEAR TREES

Yellow Transparent Dwarf Apple Tree

The ideal tree for the city lot and also well worth a trial by the orchardist. Can be planted as close as ten feet and matures at such a small size that it can be cared for and the fruit picked without the use of ladders.

PLANTING DIRECTIONS: When planting any dwarf fruit tree make sure that the bud union, which is the slight crook just above the roots, is one or two inches above the level of the ground after planting. Should the portion of the tree above the bud union be under the ground it will develop roots and the tree will no longer remain a dwarf. Dwarf trees have a small light root system and it is often necessary to stake each tree until it is well established.

NUT TREES

FILBERT OR HAZELNUT

CORYLUS AMERICANA. A compact well foliated shrub which makes a wonderful screen or used well in a shrub planting; also one may enjoy a good supply of filberts. These plants bear young and very heavy year after year.
2-3 ft. 98c each; 3-4 ft. \$1.19 each

ENGLISH WALNUT TREES

In 1915, H. J. Champion the founder of this business, planted several small English Walnut trees around the house in which he lived. In a relatively short time these came into bearing and to-day are large shapely trees bearing annually a goodly amount of nuts which are of good size, thin shell, and of unusually good flavor and quality.

NEW CHINESE CHESTNUT TREES

Several years ago chestnut blight destroyed our native chestnut. Since that time the U. S. Department of Agriculture has been searching for a blight resistant strain. After many tests it was found that a type of Chinese Chestnut was not only blight resistant but an early bearer of large, good quality nuts.

NUT TREE PRICES

	1-9 ea.	10-100 ea.
English Walnut 2-3 ft. . .	\$2.49	\$1.95
Chinese Chestnuts 18-24 in.	\$1.95	\$1.59

Cherry Trees

PLANTERS

Send us your list of trees which you want to plant and we will be pleased to quote special prices.

SWEET CHERRIES

Bing

Very large, dark brown, almost black, flesh firm, sweet and delicious. Fruits hang well on trees and ripen at one time. July.

Black Tartarian

Earlier than most other sweet cherries. It adapts itself to a wide variety of soil and climatic conditions.

Governor Wood

One of the best sweet cherries, very large, light yellow, marbled with red, juicy, rich and delicious, tree healthy, large and a good bearer.

Lambert

Jet black when fully ripe. The fruit is meaty, juicy and has a very rich flavor. Late July.

Napoleon

ROYAL ANN. A beautiful cherry of large size; pale yellow with bright red cheeks; flesh firm, juicy and sweet; one of the best for market

Schmidt

The fruits are black and large. The tree is vigorous and productive. July.

Windsor

Fruit large, liver colored and distinctive. Flesh remarkably firm and of high quality. A valuable late variety. July.

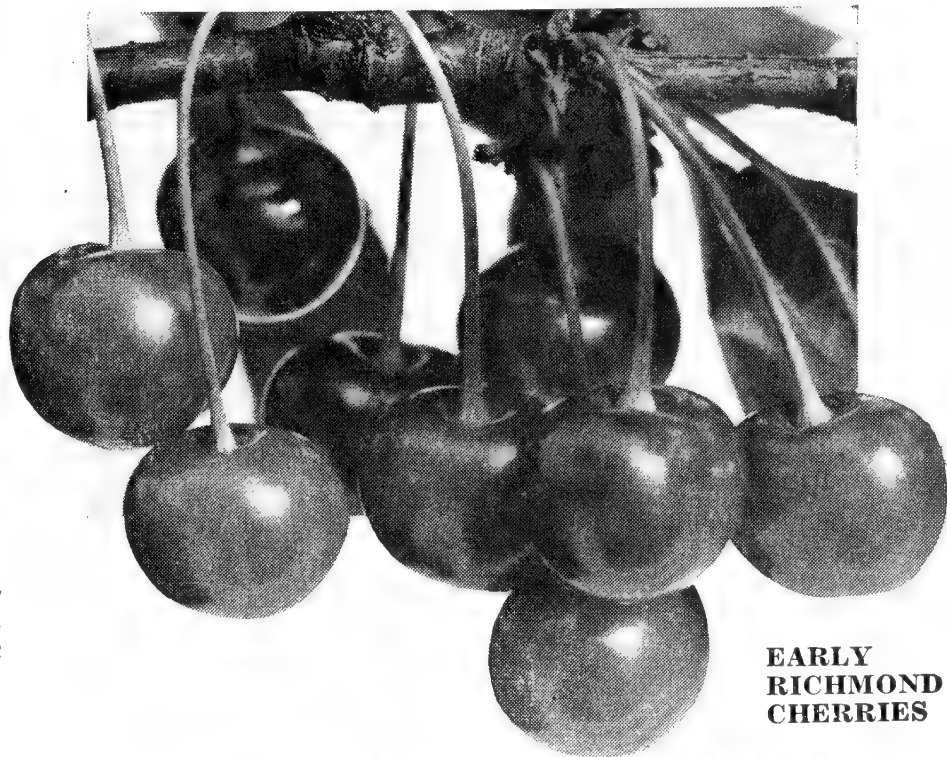

Yellow Spanish

The trees are the largest of the sweet cherries. The fruit is large, yellow with red blush. Late June.

PRICES OF SWEET CHERRIES

2-yr. 5-6 ft. $\frac{1}{16}$ in. up, 1-9, \$2.49 each,
10 up, \$1.98 each

POLLINATION: When planting Bing, Lambert or Napoleon be sure to plant one tree of another variety. Windsor is a good variety to use as it is a thrifty, vigorous tree and is a good pollinator.

EARLY
RICHMOND
CHERRIES

SOUR CHERRIES

Early Richmond

Has long been the leading sour cherry of its season. Tree of medium size and bears heavy crops when it is young. The tree thrives well in a wide range of soil and climatic conditions. June.

Montmorency

This is the most popular sour cherry grown in America. Vigorous, productive and fine quality.

SOUR CHERRY PRICES

2-yr. 5-6 ft. $\frac{1}{16}$ in., 1-9, \$2.19 each;
10 up, \$1.79 each

HANSON'S BUSH CHERRY

Beautiful as an ornamental—valuable for its fruit. Easy to grow; effective in any landscape planting and which bears delicious fruit of good size and excellent flavor. Fruit is wonderful to eat right from the bush; makes superb jam, or clear, sparkling jelly. Perfectly hardy anywhere. They always retain their dwarf stature.

Heavy 3 yr. Plants
\$1.49 each; 3 for \$3.98

Champion's Plum Trees

NOTE — Most American and European Plums seem to be self-fertile and produce fruit on their own pollen, but produce better when interplanted with other varieties.

Oriental varieties have been found to be self unfruitful and should always be interplanted at all times. Abundance is considered one of the general pollinizers.

ALBION. One of our newest varieties and one of much merit. This is, without a doubt, the best late plum on the market today. A large plum, bluish-gray in color, and one of the best for roadside markets.

ABUNDANCE. (OR.). Medium sized red, with yellow juicy tender flesh. Trees large and hardy, ripening in August.

BURBANK. (OR.). Large red fruit on a hardy and productive tree in late August.

BRADSHAW. A very large dark violet fruit which is excellent for market and shipping. August.

GREEN GAGE. (Reine Claude). Large round greenish yellow, excellent for canning, one of the best varieties. Very productive. Sept.

LOMBARD. Fruits medium to large, dark red very attractive and tempting to the eye, and readily saleable. August.

MONARCH. Large deep purplish blue, tree bears young and yields abundantly. A perfect freestone. October.

SHROPSHIRE DAMSON. Tree is a great producer bearing large crops of good dark purple plums year after year. October.

YELLOW EGG. Golden yellow with thick bloom. Flesh yellow and juicy. A very large and beautiful plum, fine for local market. September.

PRUNES

ITALIAN PRUNE (Fellenburg). The fruit is fine flavored whether eaten out of hand, prepared for the table or cured as a prune. Fruits very large purplish black with very thick bloom. September.

STANLEY PRUNE. Ripens about September 10th. A medium to large, blue prune-type plum; flesh is greenish yellow. Juicy, firm and of good quality. Stone is free.

GERMAN PRUNE. Large, dark purple, sweet, good, one of the most popular for canning because of its sweetness and lack of acid.

Lombard Plum

APRICOTS

Popular In All Sections Where Peaches Do Well

HUNGARIAN. Grows to an immense size, the fruit large and of a good quality, beautifully colored a deep yellow, with yellow flesh, and a very fine flavor. Will bear the best of any sort in the northeastern section of the United States.

NECTARINES

A smooth-skinned Plum-Peach. Tree grows like Peach. Fruit looks like large Plum. The flavor, both Peach and Plum.

GOLDMINE. A freestone ripening with Elberta, medium in size with good quality, and very attractive yellow flesh.

Prices of Prune, Plum, Nectarine and Apricot

	1-9 each	10-99 each	100 up each
2 yr. 5-6 ft. $1\frac{1}{4}$ in.	\$2.19	\$1.69	\$1.29

2 yr. 3-4 ft. $\frac{3}{4}$ in.	1.59	1.19	.79

Plant CHAMPION'S

Pear Trees

... PRODUCED FROM
BLIGHT-RESISTANT STRAINS
SUMMER VARIETIES

BARTLETT. Leads all the pears for the number of trees planted, as it is readily adaptable to a wide range of soil and climatic conditions. The fruits are large, handsome, and of a high quality, keeping and shipping remarkably well making it very desirable for the table or for market use.

CLAPP'S FAVORITE. It is the standard late summer pear to precede Bartlett, which it much resembles, in size, shape, flavor, and color.

GORHAM. The fruit ripens two weeks later than Bartlett and keeps a month longer. The fruit resembles Bartlett in size, color, and shape.

Duchess Winter Pear

COPE'S SEEDLESS PEARS

- No Core
- Blight Resistant

THIS NEW VARIETY resembles Bartlett but is seedless and coreless, and shows great resistance to fire blight. It ripens a few days later than Bartlett. Much time is saved by not having to core each pear when preparing it for use.

WINTER VARIETIES

ANJOU. The fruits are large, uniform greenish yellow, with firm, juicy flesh, and as an early winter pear it has no superior.

BOSC. The fruits of this pear are nearly flawless in every character, extra large, long and tapering russet.

DUCHESS. Very large and rich and juicy. Pick them before maturity, wrap in tissue paper and pack them away for complete ripening.

FLEMISH BEAUTY. A large, beautiful, very juicy and rich pear. September.

KIEFFER. The large size, handsome appearance, and remarkable keeping and shipping qualities puts the fruit among the best.

SECKEL. (Sometimes called the sugar pear). A small pear of excellent flavor, fine for pickling or dessert, very productive and a profitable commercial pear.

SHELDON. Medium sized, yellow, with a rich shaded cheek, flesh a little coarse, melting and juicy.

DWARF PEAR TREES

These trees are like the dwarf apple, created for a special need. They are ideal for the home owner with a small lot. They take up very little space and yet are very productive, taking into consideration the miniature size of the tree. The fruit is of standard size.

Bartlett, Duchess, and Seckel

- 4-5 ft. each \$3.49; 3 for \$9.98
- 3-4 ft. each \$2.49; 3 for \$5.49

OLD HOME PEAR

We can now supply this new blight free tree in large quantities; also a limited amount of these two year old trees which are already top-worked to Bartlett, which will bear Bartlett pears on trees free from blight due to the Old Home understock. The Old Home trees are priced the same as other pear trees which appear on this page and for the blight-free trees producing Bartlett pears please add 50c per tree.

PEAR TREE PRICES

	1-9	10-99	100 up
	each	each	each

2 yr. 4-5 ft. 3/16 in.	1.70	1.29	.89
2 yr. 3-4 ft. 1/16 in.	1.49	.99	.69

Prices on one year old whips may be had upon request.

CHAMPION'S

Apple Trees

... FROM TESTED
BEARING ORCHARDS

Our apple trees are produced from carefully selected trees in the orchard and the fruit is outstanding for color, quality, and productiveness.

RED ASTRACHAN (Summer)

An excellent summer apple for cooking.

BALDWIN (Winter)

The old favorite, bright red, good quality and an excellent keeper.

CORTLAND (Winter)

A McIntosh type, large, round, and red. Hangs on the tree longer than McIntosh and because of its tougher skin, makes a better shipper.

DOUBLE RED DELICIOUS (Winter)

An outstanding apple for table use. Bright red, flesh white and of excellent quality.

DUCHESS OF OLDENBURG (Autumn)

Large, white fleshed, red striped fruit. The best general purpose apple of its season.

GRIMES GOLDEN (Winter)

Good sized, yellow, very productive and of high quality.

BANANA (Winter)

Vigorous grower, early bearer. Fruit me-

dium to large, smooth and handsome golden yellow, flesh fine grained; highest quality.

MELROSE (Winter)

A cross of Jonathan and Delicious. Fruits larger than Jonathan—firm, crisp, and juicy and of excellent cooking and dessert quality. Fruits ripen just before Staymans and keeps well in cold storage until April.

TURLEY WINESAP (Winter)

An improved Stayman, resembling the standard Stayman closely, but less subject to cracking, and has better color.

PLANTERS

Send us a list of the trees you intend to plant as we can quote special prices to the orchardist.

APPLE TREES — Continued

EARLY HARVEST

The earliest to ripen, and the most productive of the early sorts. Champion's specially selected heavy bearing strain.

EARLY McINTOSH (Autumn)

A thrifty grower and a regular bearer. A McIntosh hybrid being almost red in color, very crisp and juicy.

SWEET BOUGH (Summer)

A pale yellow fruit ripening in August. A very good apple for home use and local markets.

KING OF TOMPKINS COUNTY (Winter)

A tasty sub-acid apple of mild flavor.

NORTHERN SPY (Winter)

An old favorite which is unexcelled in quality and keeping. Well covered with red, flesh white and tender.

RED McINTOSH (Autumn)

A selected type of McIntosh. Solid red, white flesh, very tender, and juicy.

RED JONATHAN (Winter)

A selected type for its solid red color. One of the best all-purpose apples and a very good keeper.

RED ROME BEAUTY (Winter)

A strain of Rome Beauty selected for its intense red color.

RED NORTHERN SPY (Winter)

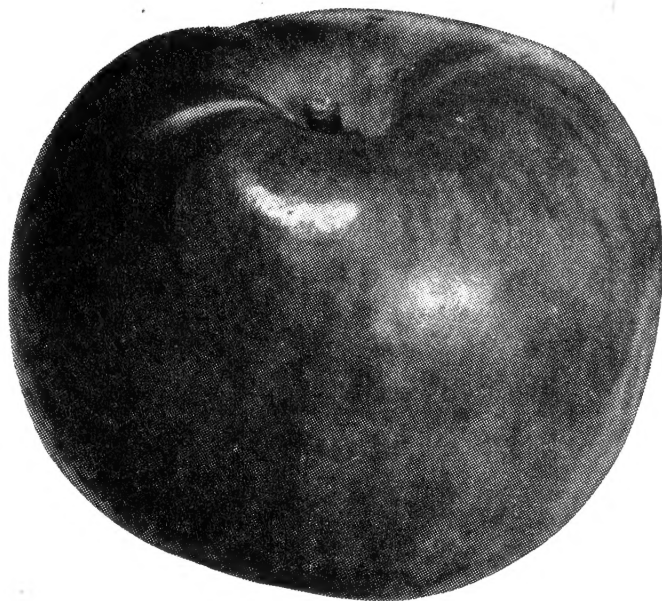

Deep red, bears younger, same as Northern Spy in taste and keeping qualities.

RED STAYMAN WINESAP (Winter)

A quick and large grower, coming into bearing at an early age. A selected red type of the old Stayman Winesap.

R. I. GREENING (Winter)

This is the best of the green apples, both for table and cooking use.

Cortland

ROME BEAUTY (Winter)

A medium sized tree which bears young. The large handsome red fruits ship and keep exceptionally well.

WEALTHY (Autumn)

The best of the Autumn apples as it bears young and is of exceptional sub-acid quality. Unexcelled for cooking.

YELLOW TRANSPARENT (Summer)

This tree is extremely hardy and comes into bearing young. The fruit is of good size and of clear yellow color. Ideal for home market and a good seller.

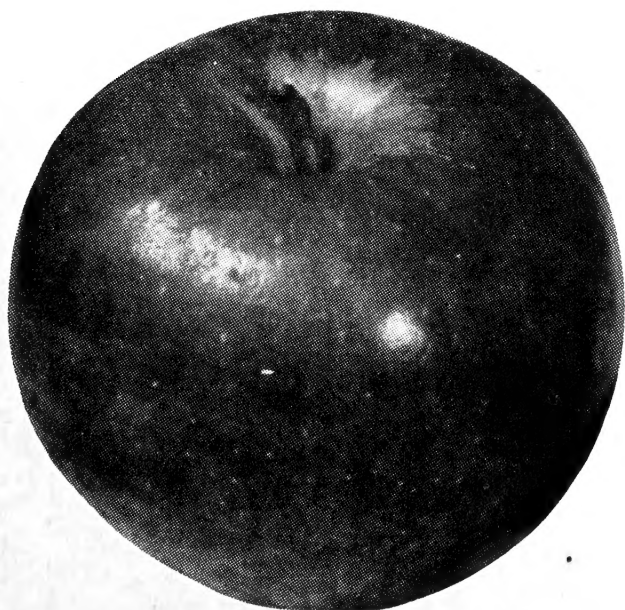

YELLOW DELICIOUS (Winter)

Same delicious quality as Red Delicious, but the color is a clear yellow. Tastes more mild and even better than Grimes Golden. Firm, crisp and very juicy.

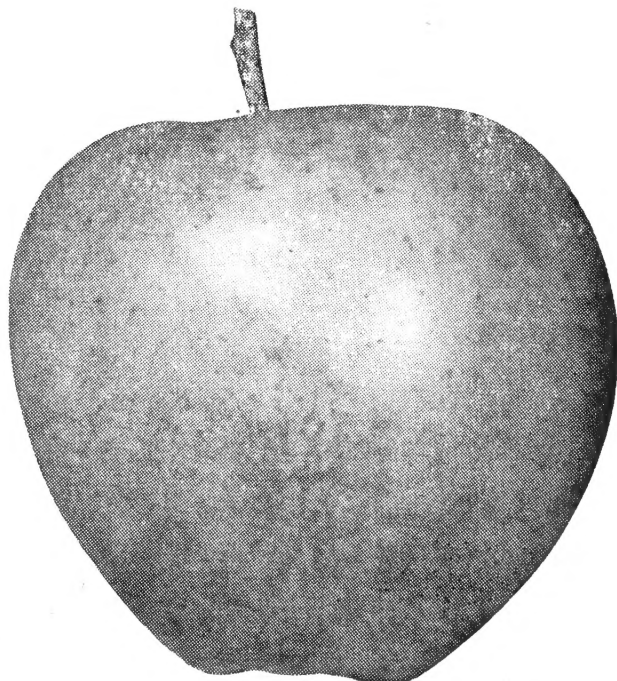

CRAB APPLES

HYSLOP

The standard American crab apple which is widely cultivated. The apples are brilliant dark red and of excellent quality.

← Jonathan

Yellow Delicious →

Peach Trees

... Five Outstanding Peaches

We recommend these outstanding five varieties for anyone desiring good fruit for home or market use. These varieties are all yellow fleshed freestone peaches covering the peach season.

GOLDEN JUBILEE

A large early yellow peach free-stoned high quality. Ripening date August 20-25.

HALE HAVEN

Rightfully placed at the top of all yellow freestone peaches. September 1-5.

RED HAVEN

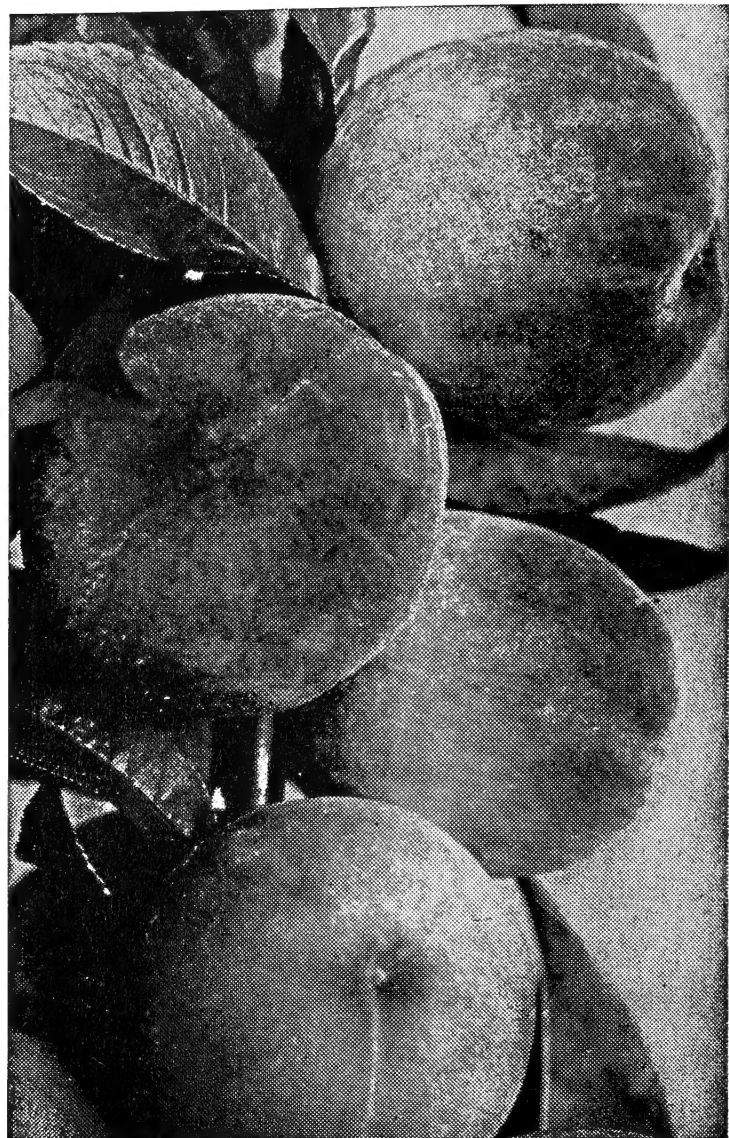

The best of the early yellow peaches coloring unusually well. August 20-21.

RED ELBERTA

A large yellow freestone peach. September 5-12.

SHIPPER'S LATE RED

A large red Elberta type peach ripening 5-10 days after Elberta.

ORCHARDISTS

Send us a list of the trees you would like to plant, as we are in a position to quote special prices on large lots.

Prolific Hale Peach

Champion White Peach

WHITE PEACHES

This group of peaches are all white fleshed and are excellent for home use, and are readily saleable at the roadside.

BELLE OF GEORGIA

Very large with red cheek and of excellent quality. September 1-5.

CHAMPION

A very large red cheeked peach which is a heavy bearer. Its flavor and quality are unexcelled. September 3-8.

CUMBERLAND

Probably the best of the white peaches for market use, as it is a very firm fleshed peach. Early August.

Yellow Peaches

The following varieties are all yellow freestone and have always given good results in this area.

PROLIFIC HALE

An improvement of J. H. Hale in that it is a heavy cropper every year. September 5-12.

LEMON FREE

The old favorite which is well known. Not too attractive but excellent in quality for canning. September 20-25.

ROCHESTER

Bears young, crops heavy, and is of good size if thinned. August 10-15.

EARLY ELBERTA

The same Elberta quality and ripening earlier to reach the profitable early market.

NEW VARIETIES

This year we have a very limited number of trees of several new varieties, which have been well recommended, **Afterglow, Albion, Early Hale Haven, Fairhaven, Fireglow, Early East, Jerseyland, Kalhaven, New Jersey, and Redskin.**

Champion's Time-Tested PEACH TREES

SALBERTA

Elberta type, large yellow and probably one of the best late varieties. September 15-25.

SOUTH HAVEN

Large, yellow, blotched with red. September 1-5.

SUMMERCREST

No one wants an Elberta after eating a ripe Summercrest. September 3-5.

GOLDENEAST

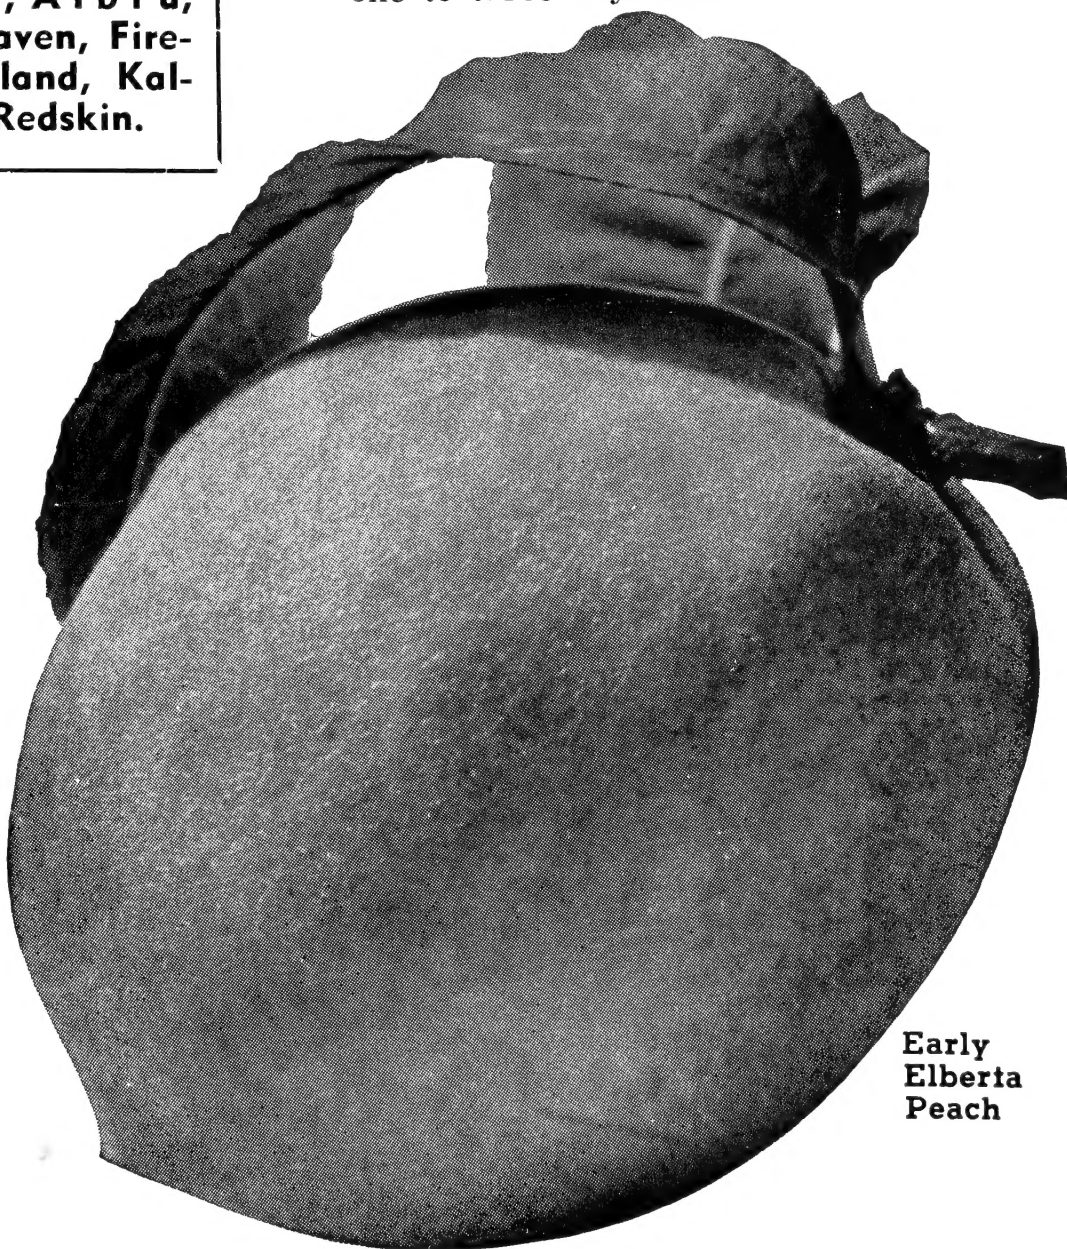

A large, high colored, good quality peach. September 1-5.

SUNHIGH

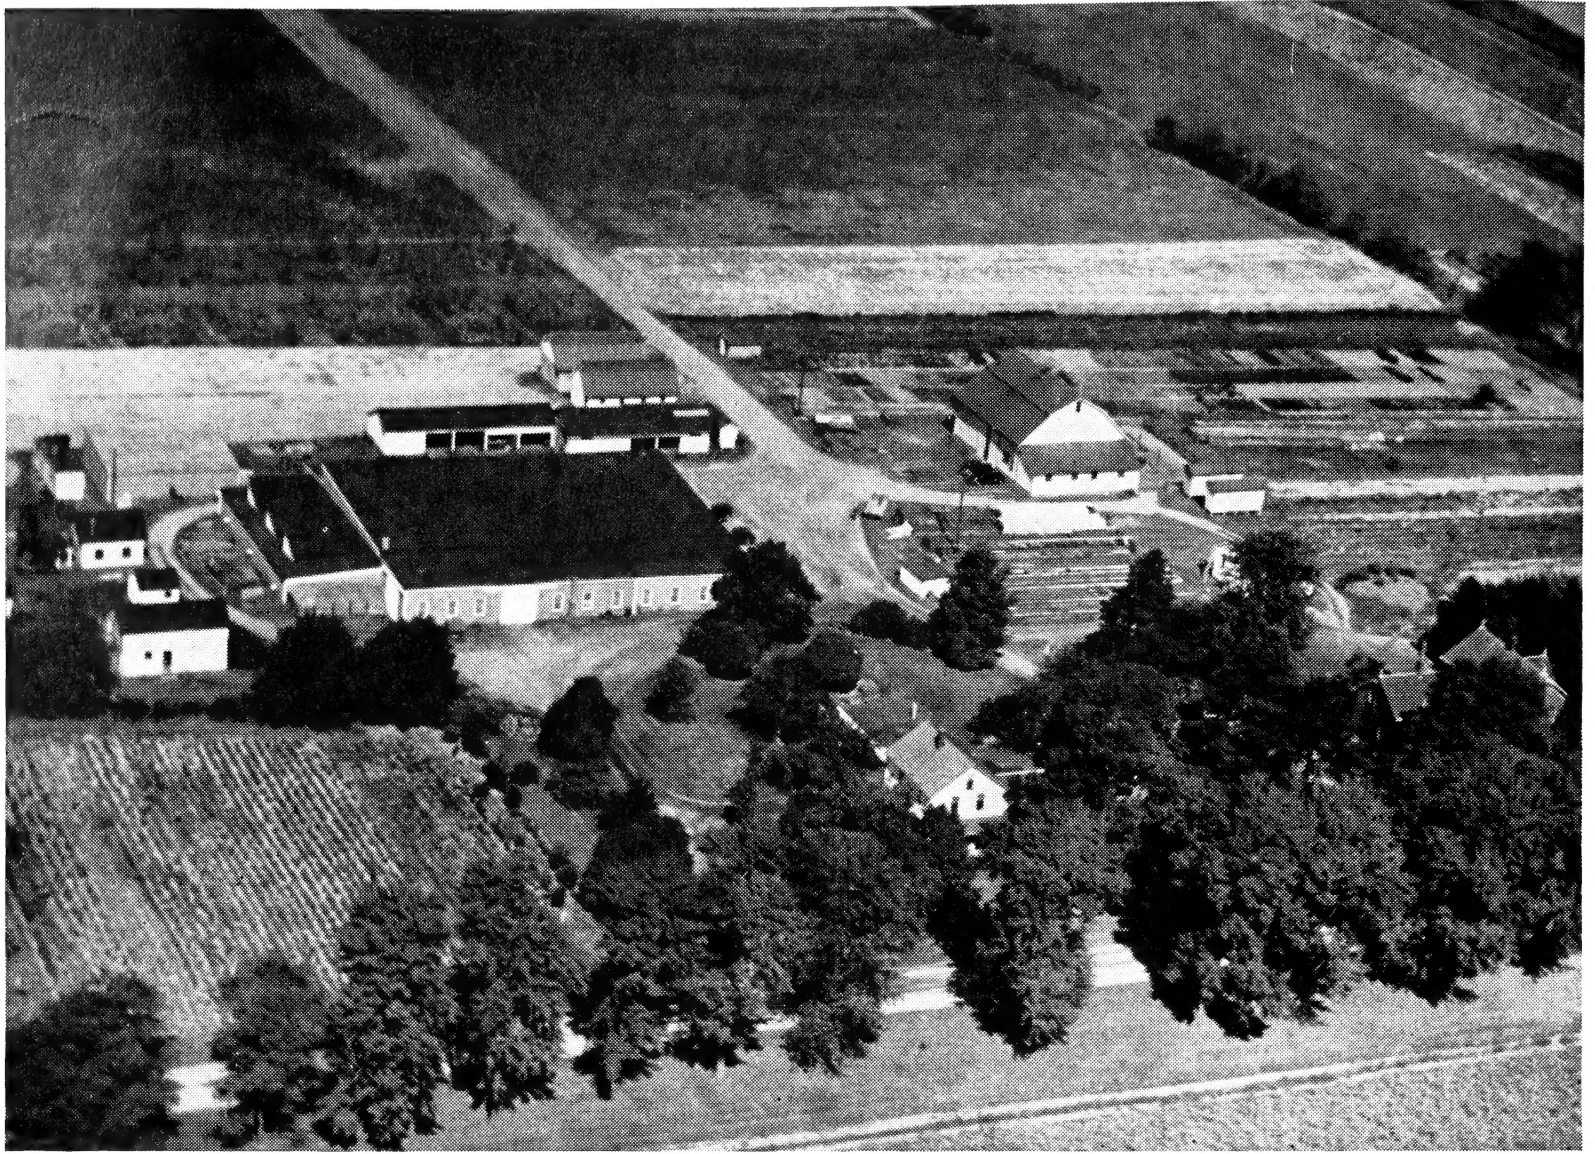

Ripening ahead of Goldeneast. This peach is well worth a trial. It is outstanding for its hardiness.

TRIOGEM

We believe this peach to be better in all respects than Golden Jubilee. It ripens one to three days later.
